

Subject card

Subject name and code	Multi-Objective Optimization Algorithms, PG_00063937						
Field of study	Informatics						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		English		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Computer Architecture -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Joanna Szłapczyńska				
	Teachers		dr hab. inż. Joanna Szłapczyńska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		9.0		36.0	75
Subject objectives	Learning modern multi-objective optimization methods and the possibilities of using them to solve real-world problems						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_W01] knows and understands, to an increased extent, mathematics to the extent necessary to formulate and solve complex issues related to the field of study	Is able to model a given optimization problem, knows the basics of how optimization algorithms work and is able to interpret the results of their operation	[SW1] Assessment of factual knowledge
	[K7_W04] knows and understands, to an increased extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or other elements or programmable devices specific to the field of study, and organization of work of systems using computers or such devices	Knows and is able to use programming platforms that offer access to multi-objective optimization algorithms	[SW1] Assessment of factual knowledge
	[K7_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, making assessment and critical analysis of the prepared software as well as a synthesis and creative interpretation of information presented with it	Is able to implement a program in a high-level language that solves a given multi-objective optimization problem	[SU4] Assessment of ability to use methods and tools
Subject contents	1. Introduction to Optimization 2. Multi-Criteria Decision Making and Multi-Objective Optimization 3. Multi-Objective Optimization Model 4. Simplifying the Multi-Objective Approach 5. AI Meta-Heuristics Used in Multi-Objective Optimization 6. Selected Meta-Heuristic Algorithms for Multi-Objective Optimization 7. Programming Libraries for Implementing Multi-Objective Optimization Algorithms 8. Methods for Considering Decision-Maker Preferences 9. Studying the Performance of Multi-Objective Optimization Algorithms		
Prerequisites and co-requisites	Knowledge of issues related to operational research, ability to program in C++ and Python		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	laboratory exercises	50.0%	50.0%
	passing	50.0%	50.0%
Recommended reading	Basic literature	1.Multiobjective Optimization - Principles and Case Studies, Y. Collette, P. Siarry, Springer, 2003 2. Multi-Objective Optimization Problems Concepts and Self-Adaptive Parameters with Mathematical and Engineering Applications, F. S. Lobato, V. Steffen Jr., Springer, 2017 3. Lecture materials.
