

Subject card

Subject name and code	Seminar Diploma, PG_00063949								
Field of study	Mechanical Engineering								
Date of commencement of studies	October 2021		Academic year of realisation of subject			2024/2025			
Education level	first-cycle studies		Subject group						
Mode of study	Part-time studies		Mode of delivery			at the university			
Year of study	4		Language of instruction			Polish			
Semester of study	7		ECTS credits			4.0			
Learning profile	general academic profile		Assessme	sessment form		assessment			
Conducting unit	Department of Manufacturing and Production Engineering -> Faculty of Mechanical Engineering and Ship Technology								
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Stefan Dzionk						
	Teachers		dr hab. inż. Stefan Dzionk						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	0.0	0.0	0.0	0.0		15.0	15	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	15		0.0		0.0		15	
Subject objectives	Familiarizing students with the methodology of writing a qualifying thesis and the way it is presented, including of the results and achievements obtained during the work.								

Data wygenerowania: 24.11.2024 05:42 Strona 1 z 2

Learning outcomes	Course outcome	Subject outcome	Method of verification				
	[K6_U03] is able to identify, formulate and develop the documentation of a simple design or technological task, including the description of the results of this task in Polish or in a foreign language and to present the results using computer software or other aiding tools	The student prepares documentation of the performed task using computer aiding programs. The student presents the adopted solutions both in Polish and in a foreign language.	[SU1] Assessment of task fulfilment				
	[K6_K01] is aware of the need for complementing the knowledge throughout the whole life, is able to select proper methods of teaching and learning, critically assesses the possessed knowledge; is aware of the importance of professional conduct and following the rules of professional ethics; is able to show resourcefulness and innovation in the realisation of professional projects	The student prepares a qualifying thesis verifying his knowledge in this field. In the prepared solution of the engineering task, the student is aware of professional behavior and taking into account non-technical aspects of this construction.	[SK2] Assessment of progress of work				
	[K6_U01] is able to acquire information from specialized literary sources, databases and other resources, essential for solving engineering tasks; is able to compile the obtained information pieces and to interpret them, additionally is able to form conclusions and present justified opinion	The student acquires information from domestic and foreign professional literature. The student verifies, interprets and draws conclusions based on data collected from the literature.	[SU4] Assessment of ability to use methods and tools				
	[K6_U02] is able to work in a team and individually, also in multidisciplinary teams, is able to draw a plan of completing a construction or technological design, shows self-learning abilities	The student prepares a plan of tasks to be performed within the subject of the thesis. The student acquires additional knowledge on the issues needed to carry out the work.	[SU2] Assessment of ability to analyse information				
Subject contents	Methodology of engineering thesis preparation using current general and specialist knowledge. The use of modern engineering tools, including computer techniques to solve engineering problems. Methodology of results presentation.						
Prerequisites and co-requisites							
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	Evaluation of the text development	60.0%	30.0%				
	Assessment of self-presentation	60.0%	30.0%				
	Summary rating	60.0%	20.0%				
	Activity in class	60.0%	20.0%				
Decemberded reading	Basic literature						
Recommended reading	Supplementary literature	Bibliography advised by the project supervisor. As above					
	eResources addresses						
Example issues/ example questions/ tasks being completed	EResources addresses Adresy na platformie eNauczanie: The form and content of the diploma thesis and regulations concerning this subject. Methods of selecting literature and form of developing the review.						
Work placement	Not applicable						

Document generated electronically. Does not require a seal or signature.
