GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Computer Adjustment Systems, PG_00049607
Field of study	Electrical Engineering

Date of commencement of studies	February 2024	Academic year of realisation of subject	2024/2025
Education level	second-cycle studies	Subject group	
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	3.0
Learning profile	general academic profile	Assessment form	exam

Conducting unit	Department of Electrical Power Engineering -> Faculty of Electrical and Control Engineering

Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Seweryn Szultka
	Teachers	

Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	30	4.0	41.0	75

Subject objectives	Discussion: basic regulatory processes, how to study the basic parameters of the control system, issues related to the process of visualization and data acquisition.

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K7_W08	Learns the principles of operation of selected devices included in the power system, recognizes the control algorithms and develops a concept for the control system of the selected device.	[SW1] Assessment of factual knowledge
	K7_U10	The student learns to determine the parameters of the control system depending on the control system. Indication of external phenomena affecting the operation of the control system, introduction of disturbances from the side of the power system.	[SU1] Assessment of task fulfilment
	K7_W09	It learns to use the programmable controller to build the indicated control system, including the possibility of visualization enabling the operation of the developed control system, archiving and data editing.	[SW1] Assessment of factual knowledge

Subject contents	**LECTURES** Regulation systems, their aims and structure. Examples of chosen regulation system block diagrams. Modifications of block diagrams. Digital control : control methods, digital measurement systems. Visualisation and archivisation of regulation data. **LABORATORIES** Laboratories consist of 2 parts. First is to create chosen regulation system using PLC controller. Second is to create visualization and archivizing application for created control system.
Prerequisites and co-requisites	Ability to programm PLC controllers. "Sterowniki programowalne"

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	laboratory	50.0%	60.0%
	lecture	50.0%	40.0%

Recommended reading	Basic literature	1. Brzózka J.: Regulatory cyfrowe w automatyce, Wyd. MIKOM, 2002. 2. Brzózka J.: Regulatory i układy automatyki, Wyd. MIKOM, 2004. 3. Kaczorek T.: Teoria układów regulacji automatycznej, WNT, 1974.

	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	1 Select the **transducer** for 4 ÷ 20**m**A. The required accuracy is not less than 5%? Assume that the measured size range is chosen properly. 2 Explain to concepts of quantization, sampling, discretization. 3 **Convert given** transmittance. The individual steps of transformation provide graphically	
Work placement	Not applicable
