

Subject card

Subject name and code	Radio Communication Antennas and MIMO Techniques, PG_00064042								
Field of study	Electronics and Telecommunications								
Date of commencement of studies	February 2025		Academic year of realisation of subject			2025/2026			
Education level	second-cycle studies		Subject group			Optional subject group Specialty subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			1.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Radiocommunication Systems and Networks -> Faculty of Electronics, Telecommunications and Informatics							mmunications	
Name and surname	Subject supervisor		dr inż. Jarosław Magiera						
of lecturer (lecturers)	Teachers	dr inż. Jarosław Magiera							
Lesson types and methods	Lesson type	Lecture	Tutorial Laboratory Proj		Projec	t	Seminar	SUM	
of instruction	Number of study hours	15.0	0.0	0.0	0.0		0.0	15	
	E-learning hours inclu	uded: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	15		2.0		8.0		25	
	Familiarization with MIMO transmission technique: its fundamentals, variants and state of the art.						art.		
Learning outcomes	Course outcome		Subject outcome		Method of verification				
	[K7_W02] knows and understands, to an increased extent, selected laws of physics and physical phenomena, as well as methods and theories explaining the complex relationships between them, constituting advanced general knowledge in the field of technical sciences related to the field of study		Knows and understands physical phenomena occurring in the antenna, associated with the conversion of an electric current into an electromagnetic field and vice versa.		[SW3] Assessment of knowledge contained in written work and projects				
	[K7_W01] knows and understands, to an increased extent, mathematics to the extent necessary to formulate and solve complex issues related to the field of study		Knows and understands the mathematical description used in electromagnetic analysis and design of linear antennas		[SW3] Assessment of knowledge contained in written work and projects				
	[K7_W03] knows and understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum		Knows and understands the structure and operation of various types of radio antennas as well as the structure and operation of MIMO multi-antenna links.			[SW3] Assessment of knowledge contained in written work and projects			

Data wygenerowania: 28.10.2024 14:14 Strona 1 z 4

1.Fundamentals od antenna theory field and circuit properties 2.Antenna selection for given requirements 3.Linear antennas 4.E-M analysis of linear antenna 5.Aperture antennas 6.Antenna arrays 7.Antenna measurements 8.Antenna airays 7.Antenna size reduction Part 2: 1.Fundamentals of MIMO technique 2.Spatial multiplexing 3.Algorithms of detection in a link with spatial multiplexing 4.Channel coding in MIMO 5.MIMO in frequency-selective channels 6.Spatial diversity 7.Transmit diversity space-time coding 8.Antenna diversity for reception 9.Multi-user MIMO (MU-MIMO) 10.Cooperative MIMO 11.Massive MIMO 11.Massive MIMO Percequisites and co-requisites Assessment methods Assessment methods Accept Souties Passing threshold Percentage of the final grade Accept Souties Souties Souties Souties Souties Souties Accept Souties Souties Souties Souties Souties Accept Souties Souties Souties Souties Accept Souties Souties Souties Accept Souties Souties Souties Accept Souties Souties Souties Accept Souties Souties Accept Souties Souties Accept Accept Souties Accept Souties Accept Souties Accept Souties Accept Souties Accept Accept Souties Accept Accept Souties Accept Accept	Subject contents	Part 1:						
2. Antenna selection for given requirements 3. Linear antennas 4. E-M analysis of linear antenna 5. Aperture antennas 6. Antenna arrays 7. Antenna measurements 8. Antenna size reduction Part 2: 1.
