

Subject card

Subject name and code	Radio Network Laboratory, PG_00064100						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	February 2025	Academic year of realisation of subject			2025/2026		
Education level	second-cycle studies	Subject group			Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			1.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Radiocommunication Systems and Networks -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Piotr Rajchowski					
	Teachers	dr inż. Piotr Rajchowski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	15	2.0	8.0	25		
Subject objectives	Gaining practical knowledge and skills related to realizing measurements of modern wireless networks (e.g. with cellular structure) and general purpose devices using a radio interface. Tasks realized during the course correspond to engineering and scientific practices used in the business environment.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_U09] can carry out a critical analysis of the functioning of existing technical solutions and assess these solutions, as well as apply experience related to the maintenance of advanced technical systems, devices and facilities typical for the field of studies, gained in the professional engineering environment	Student has learned how to interpret measurement data, is able to assess the credibility of measurements basing on the analysis of results and environmental parameters. Student is able to formulate recommendations based on the obtained results.			[SU2] Assessment of ability to analyse information [SU5] Assessment of ability to present the results of task		
	[K7_U12] is able, to an increased extent, to analyze the operation of components and systems related to the field of study, as well as to measure their parameters and study their technical characteristics, and to plan and carry out experiments related to the field of study, including computer simulations, interpret the obtained results and draw conclusions	Student is able to use laboratory and field measurement equipment to measure the parameters of wireless networks and radio communication devices. Student is able to prepare measurement scenarios using specialistic tools.			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject		

Subject contents	<p>Learning of practical measurement methods.</p> <p>Development of measurement scenarios for modern wireless networks (including 5G).</p> <p>Measurements of parameters of modern wireless networks in laboratory and field conditions.</p> <p>Measurements of radio components.</p> <p>Analysis and interpretation of measurement results.</p> <p>Preparation of a report basing on the performed measurements.</p>		
Prerequisites and co-requisites	Basic knowledge related to usage of measurement equipment (e.g. spectrum analyzer), knowledge about environment for analyzing and presenting measurement data (e.g. Matlab.)		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Short report in middle of semester	50.0%	50.0%
	Full report at the end of semester.	50.0%	50.0%
Recommended reading	Basic literature	<p>Anritsu Corporation, 5G Measurements Knowledge Hub, 2024</p> <p>Meik Kottkamp i inni, 5G New Radio, Rohde&Schwarz, 2019</p> <p>Mathworks, Test and Measurement: 5G NR waveform generation, visualization, and transmitter performance analysis, 2024</p>	
	Supplementary literature	not applicable	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	not applicable		
Work placement	Not applicable
