

。 GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Manufacturing Techniques, PG_00064123							
Field of study	Mechanical and Medical Engineering							
Date of commencement of studies	October 2024		Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	2		Language of instruction			Polish		
Semester of study	3		ECTS credits			5.0		
Learning profile	general academic profile		Assessment form			exam		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology							
Name and surname	Subject supervisor		dr inż. Aleksandra Świerczyńska					
of lecturer (lecturers)	Teachers							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0		0.0	60
	E-learning hours inclu	ided: 0.0						
Learning activity and number of study hours	Learning activity Participation ir classes includ plan		I didactic Participation in ed in study consultation hours		Self-study SUM			
	Number of study 60 hours			4.0		61.0		125
Subject objectives	The purpose of the course is for students to acquire basic knowledge of manufacturing technologies for metal components and structures.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_U04] is able to utilize empirical, analytical, simulation, and computer-based methods to formulate and solve engineering tasks in the field of medical and mechanical engineering		Knows analytical and experimental methods to evaluate the capabilities of a given manufacturing technology.			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_W02] has knowledge of structure, properties, and testing methods of construction materials or knowledge of materials and selected technologies in biomedical engineering		Describes basic manufacturing technologies with respect to their advantages, disadvantages, applicability for different materials.			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		
	[K6_W05] has knowledge in the areas of design, manufacturing, and operation of materials, machine parts, or technical devices, with a solid understanding of design principles and technical documentation preparation		Can assess the suitability of a given manufacturing method for a selected part of a machine or piece of equipment and identify the basic necessary technical documentation for that manufacturing method.			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		

Subject contents	Casting - Metallurgy of metals and their alloys. Metallurgy of pig iron. Metallurgy of steel. Methods of manufacturing castings. Manufacture of castings in sand molds by hand and machine. Molding compounds. Automation and mechanization of molding and core making. Special methods of making molds and cores. Special methods of casting. Metal Forming - Fundamentals of metal forming. Plastic deformation of metals. Effect of plastic deformation on properties of metals. Classification of plastic forming processes. Rolling of metals. Rolling of billets and slabs. Rolling of sections. Pipe rolling. Forging and pressing. Forging and pressing machines. Free forging. Die forging. Classification of forgings. Characteristics of the processes of Drawing and extrusion. Stamping of non-expandable coatings. Classification of a typical stamping die. Classification of welding processes. Outline of welding thermal processes, welding thermal cycle. Phase transformations in the weld and in the heat affected zone. Definition of weldability. Primary and secondary materials for welding. Basics of development of welding tunder flux. TIG welding. Shielding gases. Shielded gas welding with the MIG/MAG method. Welding with powdered wires. Pulsed arc welding. Laser, plasma and electron welding. Electric resistance spot, line, hump, butt short-circuit and spark welding. Inspection of welded joints, definitions of welding methods: oxygen cutting, plasma jet cutting. Laser beam cutting. Inspection of welded joints, definitions of welding discrepancies and methods of their detection.						
Prerequisites and co-requisites	Basic knowledge of physics, chemistry, materials science, electrical and mechanical engineering.						
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade				
	Mid-term and final exam colloquium	56.0%	80.0%				
	entrance tests at labs	56.0%	20.0%				
Recommended reading	Basic literature	 Klimpel A.: Technologia spawania i cięcia metali. WNT. Warszawa 1999. Walczak W. (red.): Spawalnictwo. Ćwiczenia laboratoryjne. Wydawnictwo Politechniki Gdańskiej. Gdańsk, 2000. Butnicki S.: Spawalnośc i kruchość stali. Wydawnictwo WNT. Warszawa 1991. Pilarczyk J., Pilarczyk J.: Spawanie i napawanie elektryczne metali. Wydawnictwo Śląsk, Katowice 1996. Skoblik R., Wilczewski L.: Technologia metali. Laboratorium. 2006. Murza-Mucha. K.: Techniki wytwarzania. Odlewnictwo. PWN. Warszawa 1978 					
	Supplementary literature	1. Poradnik inżyniera - Spawalnictwo. WNT Warszawa 2003. 2. Dobrucki W.: Zarys obróbki plastycznej metali. Wyd. Śląsk 1992.					
	eResources addresses	addresses Adresy na platformie eNauczanie:					
Example issues/ example questions/ tasks being completed	Describe the welding method. Compare welding/casting/molding/plastic forming methods. List the advantages and disadvantages of the manufacturing method.						
Work placement	Not applicable						

Document generated electronically. Does not require a seal or signature.
