

Subject card

Subject name and code	Corrosion of structural materials, PG_00058344								
Field of study	Hydrogen Technologies and Electromobility								
Date of commencement of studies	October 2024		Academic year of realisation of subject			2025/2026			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	3		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Hydrogen Technologies Center -> Vice-Rector for Development and Quality								
Name and surname	Subject supervisor		prof. dr hab. inż. Kazimierz Darowicki						
of lecturer (lecturers)	Teachers	1					+		
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
of instruction	Number of study hours	15.0	0.0	30.0	0.0		0.0	45	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation ir classes include plan				Self-study SUM				
	Number of study hours	f study 45		7.0		48.0		100	
Subject objectives	Understand the theory of mixed electrochemical processes, including the corrosive (mixed) potential. Methods of determining the rate of corrosion and corrosion control.								
Learning outcomes	comes Course outc		Subj	Subject outcome			Method of verification		
	[K6_U13] can use properly selected methods and devices enabling the measurement of basic quantities characterizing materials and technological processes		The student is able to measure the rate of corrosion occurring in materials and technological processes.			[SU1] Assessment of task fulfilment			
	[K6_U02] can work individually and in a team, can communicate using various techniques in a professional environment, as well as document and analyze the results of their work, can estimate the time needed to perform the entrusted task		The student implements the program content.			[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment			
	[K6_W04] knows the properties of materials used in solving simple engineering tasks related to the field of study, in particular has knowledge in the field of materials science and is able to relate the properties of materials with their structure and composition, knows the theoretical description of phenomena occurring in materials subjected to external factors		The student has knowledge in the field of materials science and the relationship between the properties of materials and their structure and composition.			[SW1] Assessment of factual knowledge			

Data wygenerowania: 22.11.2024 02:37 Strona 1 z 2

Subject contents						
Subject contents	 Water durability, electrochemical thermodynamics of metals, corrosion diagrams, kinetics of simple electrode reactions, oxidation reaction, hydrogen reduction reaction, reduction oxidation reduction, mixed electrode processes, control determination mixed electrode processes, corrosion cells, types of corrosion processes 					
Prerequisites and co-requisites	Fundamentals of general chemistry and mathematics.					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	lectures	60.0%	50.0%			
	laboratory	60.0%	50.0%			
Recommended reading	Supplementary literature	 -W.v.Baeckmann, W.Schwenk, W.Prinz, Handbook of cathodic corrosion protection, Elsevier Science USA, 1997. - N.Perez, Elektrochemistry and corrosion science, Kluwer Academic Publishers, Boston, 2004. - William D. Corbett, Using Coatings Inspections Instruments, A KTA-Tator, In Publication, 				
	- Electrochemical protection against corrosion (collective work J. Ostaszewicz), WNT, W-wa, 1991					
	eResources addresses	Adresy na platformie eNauczanie:				
Example issues/ example questions/ tasks being completed	Methods of implementation of passivation and etching of stainless steels Ways of implementing anodic protection3. Diagram of the installation for anodic protection of the tank					
Work placement	Not applicable					

Document generated electronically. Does not require a seal or signature.
