

Subject card

Subject name and code	Dynamic Systems, PG_00038123						
Field of study	Automation, Robotics and Control Systems						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Katedra Inteligentnych Systemów Sterowania i Wspomagania Decyzji -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Robert Piotrowski					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	30	3.0		17.0	50	
Subject objectives	Presentation of contemporary forms of description of dynamic systems and methods of analysis of their properties. Different categories of systems, methods of describing them, ways of studying their properties will be presented.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W10] has basic knowledge related to mechatronics and robotics systems	The student is able to develop a model of a dynamic system and carry out its analysis.			[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U08] can design and build systems and devices in the field related to mechatronics and robotics systems	Students will be able to analyse dynamic systems.			[SU3] Assessment of ability to use knowledge gained from the subject		
Subject contents	1. Signals and systems. 2. Interchangeability of the form of description of dynamical systems. 3. Discretisation of models in the form of differential equations and based on the operator transmittance. 4. System responses. 5. stability of the system.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Exercises	50.0%			30.0%		
	Written pass	50.0%			70.0%
