

Subject card

Diploma laboratory, PG_00064445							
Biomedical Engineering, Biomedical Engineering							
October 2024		Academic year of			2025/2026		
second-cycle studies		Subject group			Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Full-time studies		Mode of delivery			at the university		
2		Language of instruction			Polish		
4		ECTS credits			1.0		
general academic profile		Assessment form			assessment		
Department of Chemi	stry and Techr	ology of Func	tional Material	s -> Fac	ulty of (Chemistry	
Subject supervisor		dr hab. inż. Ev	wa Wagner-W	ysiecka			
Teachers				_		-	
Lesson type	Lecture	Tutorial	Laboratory		t	Seminar	SUM
hours	0.0	0.0	15.0	0.0		0.0	15
E-learning hours included: 0.0							
Learning activity					Self-study		SUM
Number of study hours	15		2.0		8.0		25
Implementation of the master's degree programme							
Course outcome Subject outcome Method of verification						erification	
[K7_K02] is ready to provide critical evaluation of received content and to acknowledge the importance of knowledge in solving cognitive and practical problems		The student learns the essential importance of knowledge in solving scientific and practical problems; he/she is able to evaluate and verify the results obtained during experimental work and to relate them to literature data			[SK5] Assessment of ability to solve problems that arise in practice		
[K7_U51] can conduct complex laboratory work connected with chemistry and biochemistry, specific to biomedical engineering		Student know the principles of measuring instrumentation and can use it correctly to carry out experimental work. The student is capable of working safely in a chemical laboratory according to accepted safety and hygiene principles.			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
[K7_K71] is able to explain the need to apply knowledge from humanistic, social, economic or legal sciences in order to function in a social environment		The student is aware of the importance of non-technical aspects and implications of engineering and scientific activities and the impact of scientific development on society			[SK5] Assessment of ability to solve problems that arise in practice		
[K7_U12] is able, to an increased extent, to analyze the operation of components and systems related to the field of study, as well as to measure their parameters and study their technical characteristics, and to plan and carry out experiments related to the field of study, including computer simulations, interpret the obtained results and draw conclusions Subject contents In accordance with the work plan de		them			[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment

Data wygenerowania: 24.11.2024 15:21 Strona 1 z 2

Prerequisites and co-requisites	Full degree cycle				
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade		
and criteria	Evaluation of the tasks carried out	100.0%	100.0%		
Recommended reading	Basic literature	Depending on the thesis topic; taking into account original fundamental and recent scientific articles related to the thesis topic.			
	Supplementary literature	Depending on the thesis topic; taking into account original fundamental and recent scientific articles related to the thesis topic.			
	eResources addresses	Adresy na platformie eNauczanie:			
Example issues/ example questions/ tasks being completed	Depending on the subject of the work				
Work placement	Not applicable				

Document generated electronically. Does not require a seal or signature.
