

Subject card

Subject name and code	Urban Design and Planning Project III, PG_00061574						
Field of study	Architecture						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2026/2027		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		English		
Semester of study	5		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	45.0	0.0	45
	E-learning hours included: 0.0						
	Additional information:						
	Kursy na e-nauczaniu:

	https://enauczanie.pg.edu.pl/moodle/enrol/index.php?id=19660						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	The aim of the course is to acquire learning outcomes and the ability to design complex urban structures in urban areas. (projects). The essence of the project in this semester is to familiarize students with the subject of planning cities and housing estates, in line with the idea of "WALKABLE CITIES" "COMPACT CITIES".						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U03] is able to prepare a graphic, written and oral presentation of your own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design		is able to prepare graphic, written, and oral presentations of one's own design concepts in the field of architecture and urban planning, meeting the requirements of professional notation appropriate for design		[SU5] Assessment of ability to present the results of task		
	[K6_W06] knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts		knows and understands urban design, in particular: the implementation of building complexes, local development plans, taking into account local conditions and connections,		[SW1] Assessment of factual knowledge		

Subject contents	Course content – project		
	Designing studio, lessons: Urban design. Downtown area.		
	Design of a housing and service complex. Proportions between individual elements should be selected after careful analysis of the spatial context and findings of the SUIKZP Study. The concept of development of the area covered by the study together with the analysis of the project's compliance with the Local Development Plan. Determination of detailed urban parameters for the selected quarter. ANALYTICAL PART - analysis of a selected part of the city - building an urban program. PROJECT PART - shaping a residential and service complex. The project is devoted to the problem of entering the housing and service complex into the urban urban context as an element of the urban re-urbanization and revitalization process.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Score from design project	60.0%	90.0%
	Score from seminar	60.0%	10.0%
