

Subject card

Subject name and code	Statistical Data Analysis, PG_00058746						
Field of study	Environmental Engineering						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Environmental Engineering Technology -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Eliza Kulbat				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	30	5.0		20.0	55	
Subject objectives	The purpose of the course is to familiarize students with the basics of statistical data analysis.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W01] has knowledge in the field of mathematics, including: linear algebra, mathematical analysis and elements of mathematical statistics, probability theory, applications of mathematics, including mathematical methods and numerical methods, necessary for: 1) description and analysis of hydrological phenomena; 2) description and analysis of meteorological phenomena; 3) solving project tasks of the sanitary industry;		The student has knowledge in mathematics, including: linear algebra, mathematical analysis and elements of mathematical statistics, probability calculus, applications of mathematics, including mathematical methods and numerical methods, necessary to describe and analyze hydrological and meteorological phenomena, solve design tasks of the sanitary industry and analyze environmental data.		[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U01] has the ability to self-education, can obtain information from literature, databases and other sources, uses information technology, Internet resources; can integrate the obtained information, make their interpretation, as well as draw conclusions and formulate and justify opinions		The student has the ability to self-educate, is able to obtain information from the literature, databases and other sources, uses information technology, Internet resources; is able to integrate the obtained information, interpret it, as well as draw conclusions and formulate and justify opinions.		[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
Subject contents	Preliminary data analysis: graphical representation of data, position and dispersion indices, random variable, probability. Basics of statistical inference: point and interval estimation. Visualization. Elements of machine learning.						
Prerequisites and co-requisites	Knowledge of high school mathematics.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	solution of tasks		60.0%		50.0%		
	test		60.0%		50.0%		

Recommended reading	Basic literature	Koronacki J., Mielniczuk J., Statistics for engineering and science students, Wyd. Naukowo-Tech., Warszawa 2001 (in polish)
	Supplementary literature	Łomnicki A., Introduction to statistics for natural scientists, PWN, 2023 (in polish)
	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	Calculation of descriptive statistics for a selected set of data. Application of the logarithmic scale. Box plots. Use of spreadsheets. The basics of the Python programming language.	
Work placement	Not applicable
