GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Environmental Management and Ecology, PG_00060467						
Field of study	Mechanical and Naval Engineering						
Date of commencement of studies	October 2024		Academic year of realisation of subject	2026/2027			
Education level	first-cycle studies		Subject group	Obligatory subject group in the field of study			
Mode of study	Part-time studies		Mode of delivery	at the university			
Year of study	3		Language of instruction	Polish			
Semester of study	6		ECTS credits	2.0			
Learning profile	general academic profile		Assessment form	assessment			
Conducting unit	Zakład Ekoinżynierii i Silników Spalinowych -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Blanka Jakubowska				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	18.0	0.0	9.0	0.0	0.0	27
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours	Self-study		SUM
	Number of study hours	27		3.0	20.0		50
Subject objectives	The aim of this course is to make students familiarize with the notions: causes and effects of environmental degradation, processes of purification and restoration of environmental resources, and familiarization with the current legal status, models and concepts of environmental management and the structure of environmental management in Poland.						

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_K02] understands ex-technical aspects of the activities included in the profession of a mechanical engineer, among others its social impact and influence on the condition of an environment; is aware of the responsibility connected with the decisions made in connection with engineering activity	The student combines social, economic and ecological issues with the issues of environmental protection.	[SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills
[K6_W15] possesses a knowledge necessary to understand the ex-technical conditions of engineering activity, possesses knowledge on management, including quality management and running commercial enterprise, within the range of protection of intellectual property and patent law; knows general principles of creating and developing forms of individual entrepreneurship and basic HSE rules applicable to machine industry	The student adheres to the principles of occupational health and safety during laboratory classes. On specific examples, the student confirms the knowledge acquired in the previously studied subjects.	[SW3] Assessment of knowledge contained in written work and projects
[K6_U14] is able to analyse the operation of devices and compare the construction solutions applying usage, safety, environmental, economic and legal criteria	The student is able to analyze the operation of devices used in the processes of purification and restoration of environmental resources. The student knows the basic principles of environmental impact assessment and the elements of safety and industrial risk management.	[SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task [SU2] Assessment of ability to analyse information

Subject contents

Lecture: Causes and effects of environmental degradation.Methods of purification and restoring environmental resources.The concept of sustainable development.Activities in the field of environmental protection.Industrial ecology.Models and definitions of environmental management and environmental management.Environmental management systems.Ecological and legal aspects of management systems.Best practices in technique and technologies.Primary and secondary methods for the elimination or reduction of emissions harmful to the environment.Laboratory: Various techniques of environmental engineering - sorting materials, mixing, separating pollutants. Economic issues related to the valuation of the use of the environment.

Prerequisites and co-requisites

Fundamentals of physics, chemistry and fluid mechanics

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
laboratory	56.0%	50.0%
lecture	56.0%	50.0%
