

Subject card

Subject name and code	Modern thermal power plants and polygeneration, PG_00055945						
Field of study	Power Engineering						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Zakład Maszyn Przepływowych -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Krzysztof Kosowski					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	15.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	30	2.0		18.0	50	
Subject objectives	Knowledge of modern, advanced power plants for electric power stations and distributed systems of energy						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W13] has basic knowledge of the operation of energy equipment in the field of thermal power plants, thermal and energy and heating systems, internal combustion engines, compressors and rotating machines, has basic knowledge of the regulation of energy equipment and methods of their selection depending on the needs	Students know the main principles of operation of power plants			[SW1] Assessment of factual knowledge		
	[K6_W06] knows classic and developmental energy technologies, rules for the selection and operation of heat and energy devices and installations, basic principles of energy systems operation, basic issues regarding the reliability of energy devices and diagnostics, environmental effects of energy technologies used, methods of using renewable energy sources	Students can: - perform preliminary design calculations of large output power plants and distributed energy systems, - describe modern power plants			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U06] is able to use the basic knowledge on the operation of energy equipment in the field of thermal power plants, thermal and energy and heating systems, combustion engines, compressors and rotating machines to assess the technical condition of the system	Students know the main characteristic parameters of the operation of power plants.			[SU3] Assessment of ability to use knowledge gained from the subject		

Subject contents	<p>Modern steam turbine power plants with advanced supercritical parameters.</p> <p>Modern gas turbines units of high efficiency.</p> <p>Combined gas-steam power plants.</p> <p>Nuclear power plants with reactors of III+ and IV generations.</p> <p>Hydrogen power plants.</p> <p>Power plants for distributed energy systems.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
Recommended reading	<p>Basic literature</p> <p>Supplementary literature</p> <p>eResources addresses</p>	<p>1. S. Perycz, "Turbiny parowe i gazowe" (Polish) ("Steam and gas turbines), Ossolineum,</p> <p>2. K. Kosowski, "Steam and gas turbines. With examples of Alstom technology", 2007</p> <p>1. Contemporary books, journal articles and conference papers</p> <p>Adresy na platformie eNauczenie:</p>	<p>test</p> <p>60.0%</p> <p>100.0%</p>
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
