

Subject card

Subject name and code	Diploma seminar, PG_00055951						
Field of study	Power Engineering						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2027/2028		
Education level	first-cycle studies		Subject group		Optional subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	7		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Zakład Maszyn Przepływowych -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Marian Piwowarski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	15.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		36.0		49.0	100
Subject objectives	The aim of the course is to prepare for writing a diploma thesis and to monitor the progress in the implementation of the diploma thesis.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_K02] is able to work in a group taking different roles in it, can think and act in an entrepreneurial way, is aware of responsibility for their own work and responsibility for teamwork	The student is able to work in a group and take responsibility for group work.	[SK1] Assessment of group work skills
	[K6_U01] can obtain information from literature and other sources, organize, interpret it and draw and formulate conclusions; has the ability to self-educate, interprets the results of completed engineering tasks, is able to design simple energy systems and their systems	The student presents the progress of the thesis, knows the current state of the law in Poland and the EU in the field of energy law and energy technology, performs the literature review required for the thesis.	[SU4] Assessment of ability to use methods and tools
	[K6_K01] is aware of the need for training and self-improvement in the profession of energy and the possibility of further education; can think and act in a creative and entrepreneurial manner; can define priorities for the implementation of an individual or group task	The student presents the progress of the thesis in the form of presentation with an indication of self-motivation of self-study	[SK2] Assessment of progress of work
	[K6_W08] has basic knowledge in the field of intellectual property protection and patent law, knows and understands the basic processes of energy production and use, knows and understands the principles of modern heating and power systems	The student has knowledge of intellectual property and patent protection in the field of modern heat and power systems.	[SW2] Assessment of knowledge contained in presentation
	[K6_U13] can read architectural, construction and geodesy drawings, and can use the known computer software to prepare a drawing part of technical documentation for the sanitary, energy, hydropower industry and prepare a text or presentation including a discussion of the implemented results	The student is able to use IT tools in the design of energy installations and systems.	[SU4] Assessment of ability to use methods and tools
Subject contents	Basic information on intellectual property in European and national law. Individual student work related to the preparation of subsequent stages of the diploma thesis, the results of which are presented and assessed during seminar classes.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	presentation	100.0%	100.0%
