

Subject card

Subject name and code	Energy Auditing, PG_00055968							
Field of study	Power Engineering							
Date of commencement of studies	October 2024		Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	6		ECTS credits			3.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Department of Electri	cal Power Eng	neering -> Fac	culty of Electric	al and C	Control I	Engineering	
Name and surname	Subject supervisor		dr hab. inż. Pa	aweł Bućko				
of lecturer (lecturers)	Teachers							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Laboratory Project		Seminar	SUM
of instruction	Number of study hours	15.0	0.0	0.0	15.0		0.0	30
	E-learning hours inclu	uded: 0.0						
Learning activity and number of study hours	Learning activity		Participation in didactic classes included in study plan		Participation in consultation hours		udy	SUM
	Number of study hours	30		8.0				75
Subject objectives	Student achives the o	alifications of a	an energy audit	tor.				
Learning outcomes	Course out	Course outcome Subject outcome Metho					Method of ver	ification
	[K6_W08] has basic knowledge in the field of intellectual property protection and patent law, knows and understands the basic processes of energy production and use, knows and understands the principles of modern heating and power systems		The student can assess the heat supply system of the building.			[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U05] is able to formulate and carry out energy balances in devices and energy systems, also perform an energy audit of a simple building object, is able to perform a preliminary profitability analysis of a planned energy investment		The student is able to perform an energy audit.			[SU1] Assessment of task fulfilment		
	[K6_W07] knows the basics of economic calculus in the energy sector; knows the legal, organizational and economic principles of the functioning of energy markets, knows the basic principles of management and running a business		The student is able to calculate and use investment profitability indicators to choose the option of energy-efficient modernization.			[SW3] Assessment of knowledge contained in written work and projects		
Subject contents	Energy audit system. Role and aims of auditor work. Structure of energy audit and organization of its preparation. Organization of data collecting and analyzing processes. Data collection forms. Presentation of energy audits examples. Choosing of energy sources. Criterions of choose. Possibilities of energy source substitution. Calculation of investments costs. Complex analysis of energy conservation modernization program. Non-economic criterions for analysis of modernization effects. Environmental effects of energy conservation programs. Preparation of energy audit of the object. Estimation of energy consumption before the modernization. Proposal of energy conservation modernizations. Effectiveness analysis of implemented modernizations.							
Prerequisites and co-requisites	Sadio of monthal technic							

Data wydruku: 30.06.2024 21:45 Strona 1 z 2

Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Project	60.0%	100.0%			
Recommended reading	Basic literature	Górzyński J: Audyting energetyczny. Warszawa: Fundacja Poszanowania Energii 2002.				
	Supplementary literature	Robakiewicz M.: Ocena cech energetycznych budynków. Fundacja Poszanowania Energii 2005.				
	eResources addresses	Adresy na platformie eNauczanie:				
Example issues/ example questions/ tasks being completed	Calculation of seasonal energy demand for heating a building.					
	2. Calculation of energy demand for the hot water.					
Work placement	Not applicable
