

Subject card

Subject name and code	Renewable Energy Sources, PG_00042100						
Field of study	Power Engineering						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			English		
Semester of study	5	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Energy and Industrial Apparatus -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	Presentation of the modern achievements and tendencies in the area of renewable energy resources utilization. Classification of renewable energy resources. Possibilities of renewable energy resources utilization. Discussion of theoretical backgrounds of selected technologies.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K6_W06] knows classic and developmental energy technologies, rules for the selection and operation of heat and energy devices and installations, basic principles of energy systems operation, basic issues regarding the reliability of energy devices and diagnostics, environmental effects of energy technologies used, methods of using renewable energy sources		The student knows the value of CO2 emissions for each technology. Can determine the efficiency of appliances.				
	[K6_W10] knows the basic installations in the field of renewable energy sources and their impact on the environment		Student zna podstawowe charakterystyki odnawialnych źródeł energii.				
	[K6_W11] has knowledge of known technologies and non-technical aspects to solve simple engineering tasks in the field of energy systems and devices						

Subject contents	<p>Lecture: energy resources, ocean and sea resources, tidal energy, wave energy, osmotic energy, ocean thermal energy conversion, wind energy, Betz criterion, aerogenerators, hydro-power, water turbines, hydropower stations - types and characteristics, geothermal energy, dry rock and aquifer resources, geothermal power stations and heat-generating plants, solar energy, solar collectors, solar ponds, solar "power tower", solar "thermal tower", photovoltaics.</p> <p>Tutorial: estimation of the power of tidal, wave and osmotic power plant as well as OTEC cycle, wind power, rotor diameter of aerogenerator, calculation of the power of hydropower plant, efficiency of geothermal power plant, surface area and efficiency of solar collector.</p> <p>Laboratory: 1. Characteristics of solar collector 2. Characteristics of photovoltaic panel 3. Characteristics of micro-wind generator 4. Operation of hydropower plant.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1" data-bbox="451 551 1487 651"> <thead> <tr> <th data-bbox="451 551 794 584">Subject passing criteria</th> <th data-bbox="794 551 1137 584">Passing threshold</th> <th data-bbox="1137 551 1487 584">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 584 794 618">Test</td> <td data-bbox="794 584 1137 618">56.0%</td> <td data-bbox="1137 584 1487 618">90.0%</td> </tr> <tr> <td data-bbox="451 618 794 651">Laboratory reports</td> <td data-bbox="794 618 1137 651">90.0%</td> <td data-bbox="1137 618 1487 651">10.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Test	56.0%	90.0%	Laboratory reports	90.0%	10.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Test	56.0%	90.0%										
Laboratory reports	90.0%	10.0%
