

Subject card

Subject name and code	Fundamentals of Manufacturing Technology, PG_00055382						
Field of study	Mechanical Engineering						
Date of commencement of studies	October 2024	Academic year of realisation of subject				2025/2026	
Education level	first-cycle studies	Subject group				Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	3	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				exam	
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Daniel Chuchala					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		4.0		36.0	100
Subject objectives	Preparation for recognizing the processes of manufacturing mechanical elements						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U09] is able to plan the manufacturing, assembly and quality control processes of typical constructions and mechanical devices, estimating their costs	The student is able to select the correct parameters of the cutting process with the use of tool catalogs, also in on-line versions, for a given set of workpiece material and cutting edge material			[SU4] Assessment of ability to use methods and tools		
	[K6_U04] is able to perform a critical analysis of the existing technical solutions, present the specification of the technology of manufacturing basic construction elements of machines and engineering assemblies	The student is able to determine the necessary manufacturing processes to produce a given mechanical element			[SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information		
	[K6_U08] is able to design a technological manufacturing process for typical elements of machines or devices, using analytical and numerical calculating tools	The student is able to use on-line tools to select machining parameters, as well as to calculate the shortening of sheets during the bending process on press brakes.			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	[K6_W11] possesses knowledge on design, technology and manufacturing of machine parts, metrology, and quality control; knows and understands methods of measuring and calculating values describing the operation of mechanical systems, knows calculating methods applied to analyse the results of experiments	The student is able to choose the correct production process, technological machine and the type of tools for the implementation of the production process of a given element.			[SW1] Assessment of factual knowledge		

Subject contents	<p>LECTURE Geometric and kinematic parameters of cutting. Tool and workpiece movements. The geometry of the blades in the tool and working system, the geometry of the cut layer. The phenomenon of formation of chips and types of chips. Heat and temperature in the cutting zone. Cooling and lubricating agents. Wear of cutting tools. Cutting force and power. Tool materials and rules for their selection. Basic methods of machining: turning, milling, drilling, countersinking, reaming. Molding - Metallurgy metals and their alloys. Casting manufacturing methods. Special methods of making molds and cores. Special casting methods. Plastic Working - Basics of plastic working. Plastic deformation of metals. The influence of plastic deformation on the properties of metals. Classification of plastic working processes. Metal rolling. Forging and pressing. Pulling and extrusion. Technology for pulling bars, wires and pipes. Technology of extrusion processes. Punching of non-unfolding coatings. Metal cutting. Metal bending. Multiple and simultaneous pressing.</p> <p>LABORATORY Cutting materials and cutting-off machines. Machining on lathes. Machining on drills. Machining on milling machines. Machining of gears. Machining on grinders. Machining on planers and slotters. Preparation of the production of castings. Making forms using the split and non-split model. Plastic working machines. Influence of crushing on the mechanical properties of metals. Rolling. Plastic bending of profiles and pipes. Punching of non-unfolding coatings.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1" data-bbox="448 710 1497 815"> <thead> <tr> <th data-bbox="448 710 794 741">Subject passing criteria</th> <th data-bbox="794 710 1141 741">Passing threshold</th> <th data-bbox="1141 710 1497 741">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 748 794 779">Laboratory</td> <td data-bbox="794 748 1141 779">100.0%</td> <td data-bbox="1141 748 1497 779">30.0%</td> </tr> <tr> <td data-bbox="448 786 794 815">Lecture</td> <td data-bbox="794 786 1141 815">56.0%</td> <td data-bbox="1141 786 1497 815">70.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Laboratory	100.0%	30.0%	Lecture	56.0%	70.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Laboratory	100.0%	30.0%										
Lecture	56.0%	70.0%
