| | [K6_W02] has a knowledge in term of physics that includes mechanics, thermodynamics, optics, electricity, magnetism, atomic physics, nuclear physic, solid state physics, including the knowledge necessary to understand basic phenomena occurring in mechatronic elements and systems and its surroundings | | The student has systematic knowledge of modern physics: vibrations, mechanical waves, RLC circuits, electromagnetic waves, optics, matter waves, elements of atomic physics and nuclear energy, basics of quantum physics | | | [SW1] Assessment of factual knowledge | | |
| | | | The student understands the importance of non-technical aspects and effects of engineering activities, including its impact on the environment. | | | [SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task | | |
| | [K6_U01] is able to acquire information from literature, databases and other, properly chosen sources, integrate these information, interpret them, draw conclusions and formulate opinions | | The student understands the importance of non-technical aspects and consequences of engineering activities, including their impact on the environment. | | | [SU3] Assessment of ability to use knowledge gained from the subject | | |
