

Subject card

Subject name and code	Programming of computer systems, PG_00060472						
Field of study	Mechatronics						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Division of Mechatronics -> Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Marek Galewski				
	Teachers		dr inż. Yurii Tsybrii dr hab. inż. Marek Galewski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	30.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		10.0		55.0	125
Subject objectives	Teaching students of structural (in C language) and object oriented programming (n Java) basics, relational databases and essentials of software engineering (software lifecycle, development methods, system modelling).						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U05] is able to use properly chosen tools to compare design solutions of elements and mechatronics systems according to given application and economic criteria (e.g. power demand, speed, costs)		Student presents basic skills in modern programming tools and techniques		[SU4] Assessment of ability to use methods and tools		
	[K6_W11] has knowledge about the life cycle of mechatronic systems and objects		Student describes life cycle of IT systems and selected methods of development of such systems		[SW1] Assessment of factual knowledge		
	[K6_W06] has organised knowledge in the field of informatic that includes architecture of computer systems, programming of computers and embedded systems and elements of software engineering		Student understands basic principles of structural and object oriented programming		[SW1] Assessment of factual knowledge		
[K6_U09] is able to formulate an algorithm, knows low and high level programming languages and appropriate IT tools for developing computer programmes to control mechatronic system		Student develops simple structural and object oriented programs in C and Java		[SU1] Assessment of task fulfilment			

Subject contents	<p>Lectures</p> <p>Programming in C language: basic elements of the C language, basic elements of program, functions, conditional statements, loops, I/O operations, array operations, strings, pointers; Programming in Java language: basic elements of the Java language, elements of object oriented programming (Classes, objectd, inheritance), I/O operations, collections, programming for GUI ; Software engineering: software life-cycle, development tehniques UML modelling language; Relational databeses (SQL);</p> <p>Project:</p> <p>Basics of programming in C language Basics of programming in Java language</p>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="454 658 794 685">Subject passing criteria</th> <th data-bbox="798 658 1137 685">Passing threshold</th> <th data-bbox="1141 658 1482 685">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="454 689 794 716">Individual projects</td> <td data-bbox="798 689 1137 716">50.0%</td> <td data-bbox="1141 689 1482 716">20.0%</td> </tr> <tr> <td data-bbox="454 721 794 748">Written exam</td> <td data-bbox="798 721 1137 748">52.0%</td> <td data-bbox="1141 721 1482 748">60.0%</td> </tr> <tr> <td data-bbox="454 752 794 779">Obligatory project excercises</td> <td data-bbox="798 752 1137 779">60.0%</td> <td data-bbox="1141 752 1482 779">20.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Individual projects	50.0%	20.0%	Written exam	52.0%	60.0%	Obligatory project excercises	60.0%	20.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Individual projects	50.0%	20.0%													
Written exam	52.0%	60.0%													
Obligatory project excercises	60.0%	20.0%

Example issues/ example questions/ tasks being completed	<p>The list of sample questions for the exam (around 50) and laboratory individual projects (around 40) are given to the student during the semester.</p> <p>Sample examination questions:</p> <ul style="list-style-type: none"> - How does type cast operation work? When do we use it and why? Provide examples of type casting in C. - What is pointer data type used for? When do we use it? What are it's advantages? What danger it brings for a program? Provide an example of pointer declaration and initialization. - Describe principles of Object Oriented Analysis, Modelling and Design. - Describe basic elements of relational data model.
