

Subject card

Subject name and code	Marine and Offshore Structures, PG_00060564						
Field of study	Naval Architecture and Offshore Structures						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Zakład Energetyki i Automatyki Morskiej -> Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Jerzy Kowalski					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	15.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	60	6.0		34.0	100	
Subject objectives	The aim of the course is to familiarize students with the methods of obtaining raw materials, including crude oil and natural gas from under the seabed as well as obtaining energy from renewable sources on the example of offshore wind farms.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W05] has an organized knowledge on design, construction and operation of ocean technology objects and systems	knows the principles of machine design			[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U05] can formulate a simple engineering task and its specification within the range of design, construction and operation of ocean technology objects and systems	formulates a simple engineering task and its specification in the field of design, production and operation of ocean technical facilities and systems			[SU1] Assessment of task fulfilment		
	[K6_K03] is aware of the impact of non-technical aspects on the engineer's work and the impact of engineering activities on the natural environment	knows the principles of ergonomics and safety			[SK5] Assessment of ability to solve problems that arise in practice		

Subject contents	<p>The lecture material includes knowledge of:</p> <p>methods of searching for crude oil and natural gas under the seabed, installation and construction of individual elements of the oil field, basic offshore drilling methods, methods of laying submarine pipelines, the type of ocean engineering facilities for offshore works, including drilling and construction, machinery and equipment units for the construction and operation of the oil field (FSU / FSO, FPSU / FPSO, FPDSO, drilling and production platforms), offshore crude oil and natural gas reloading operations, offshore wind farm locations, installation and construction of wind farms, production of renewable energy, Polish and international regulations and institutions supervising the course of individual investment stages, starting from the conceptual design, ending with operation and distribution.</p> <p>The exercises and projects are aimed at making calculations and projects related to equipment and systems for oil and gas production and their installation (based on DNV, API, ISO regulations), including:</p> <p>fixed and detachable connections of elements the subsea structures, calculations, design and selection of pipelines for the transport of oil and gas, lowering of the structure from the deck of the ship/rig, on the seabed at a predetermined wave height. operations deposition components oil field on the seabed, calculation and selection the support structure for offshore wind farms.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 725 794 757">Subject passing criteria</th> <th data-bbox="799 725 1141 757">Passing threshold</th> <th data-bbox="1145 725 1492 757">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 757 794 788">lecture - tests (2 or 3)</td> <td data-bbox="799 757 1141 788">60.0%</td> <td data-bbox="1145 757 1492 788">50.0%</td> </tr> <tr> <td data-bbox="453 788 794 869">exercises and design - calculations and design of offshore devices and systems</td> <td data-bbox="799 788 1141 869">60.0%</td> <td data-bbox="1145 788 1492 869">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	lecture - tests (2 or 3)	60.0%	50.0%	exercises and design - calculations and design of offshore devices and systems	60.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
lecture - tests (2 or 3)	60.0%	50.0%										
exercises and design - calculations and design of offshore devices and systems	60.0%	50.0%
