

§ GDAŃSK UNIVERSITY § OF TECHNOLOGY

Subject card

Subject name and code	Computer Aided Design of the Hull, PG_00060542								
Field of study	Design and Construction of Yachts, Naval Architecture and Offshore Structures								
Date of commencement of studies	October 2024		Academic year of realisation of subject			2025/2026			
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	4		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						Ship		
Name and surname	Subject supervisor		dr inż. Cezary Żrodowski						
of lecturer (lecturers)	Teachers								
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
of instruction	Number of study hours	15.0	0.0	0.0	30.0		0.0	45	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	45		5.0		50.0		100	
Subject objectives	Getting to know the characteristics of the available CADCAM/CAE computer-aided design software for the maritime industry and mastering the skills of its use on selected examples of hull design.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_K03] is aware of the impact of non-technical aspects on the engineer's work and the impact of engineering activities on the natural environment		The student is able to use functionalities of CAD tools, supporting sustainable design			[SK2] Assessment of progress of work			
	[K6_W04] has knowledge in the field of computer science, electronics, electrical engineering, automation and control, information technology, computer graphics, useful for understanding the possibilities of their use in ocean engineering		141 / 5,000 Translation results Translation result The student correctly selects CAD tools for various design problems, taking into account the advantages and disadvantages of mesh and parametric geometry.			[SW3] Assessment of knowledge contained in written work and projects			
	[K6_U02] can work individually and in a team, communicate through various techniques in professional environment and also record, analyse, and present the results of work, can estimate the time needed to complete a given task		The student demonstrates knowledge of individual and team work techniques built into modern CAD software			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment			

Subject contents	1. CAD/CAM/CAE software for maritime industry, functionality, requirements, comparison of available programs.						
	 Modeling of parametric hull shape and propeller Modeling of hull compartmentation Calculation of ship hydrostatics and stability Hydrodynamic resistance simulation (CFD) 						
	6. Strength simulations (MES)						
	7. Optimization of parametric shape with MDO software						
	8. Generating od 2D documentation on the basis of 3D model.						
Prerequisites and co-requisites	Basic computer skills.						
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	Realsation of ongoing exercises	50.0%					
	Presentation of selected subject	50.0%	30.0%				
Recommended reading	Basic literature	Carl Machover: "C4"					
	User's manuals for selected programs:						
	1. Inventor						
		2. SolidWorks					
		4. AVEVA Marine					
		5. Maat Hydro					
		6. Star-CCM+					
		7. PolyCAD					
		8. Delft Ship					
		9. NAPA					
		10. FORAN					
		11. Maxsurf					
	Supplementary literature e-learning course o eNauczanie platform						
	eResources addresses	Adresy na platformie eNauczanie:					

Example issues/ example questions/ tasks being completed	1. Parametric model of hull form.
	2. Associative model of hull assembly.
	3. CFD simulation of propeller.
	4. FEA simulation of simple structure.
Work placement	Not applicable
