

Subject card

Subject name and code	Metrology, PG_00060579						
Field of study	Design and Construction of Yachts						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Stefan Dzionk				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	Getting acquainted with the basic principles of metrology and preparation for measuring mechanical quantities with the analysis of the results.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W06] has well-organised knowledge of engineering methods and design tools enabling the conducting of projects in the field of construction and operation of yachts		[K6_W11] has knowledge in the field of design, technology and production of machine parts, metrology and quality control, knows and understands methods of measurement and calculation of basic quantities describing the operation of mechanical systems, knows basic computational methods used to analyze experimental results.		[SW1] Assessment of factual knowledge		
	[K6_U03] able to use computer-aided design methods for yachts design, construction and operation		[K6_U05] is able to plan an experiment in the field of measuring basic operating parameters of mechanical devices using specialized equipment, interpret the results and draw appropriate conclusions.		[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		
Subject contents	Basic concepts of metrology. Methods, errors and uncertainty of measurements. Tolerance and fits of lengths and angles. Methods of dimensional analysis. Principles of interchangeability of machine parts. The accuracy of the workmanship of the items. Elements of product geometry specification, tolerance of shape, direction and position. Characteristics of the geometrical structure of the surface of objects. Principles of geometric tolerance. Standards and measuring instruments. Coordinate measuring machine and measuring systems. Automation of measurements.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Laboratory		100.0%		50.0%		
	Lecture		60.0%		50.0%
