

Subject card

Subject name and code	Electrotechnics and Electronics in Transport, PG_00060645						
Field of study	Transport and Logistics						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Zakład Wyposażenia Okrętu -> Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Wojciech Leśniewski					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	45	4.0		26.0		75
Subject objectives	Familiarize students with the basics of electrical engineering and electronics						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_K01] is aware of the need for continuous improvement in the field of the profession and knows the possibilities of further education	The student is able to notice shortcomings knowledge in a specific field i can complete them			[SK5] Assessment of ability to solve problems that arise in practice		
	[K6_W03] has well structured knowledge of hydromechanics, thermodynamics, machine construction, ecology, material science and electrical engineering necessary to understand the principles of construction and operation of means of water transport	Has knowledge in the field of electrical engineering and electronics and is able to use it as part of analytical and design tasks related to ocean technical issues			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
Subject contents	<ul style="list-style-type: none">• Electric current, sources of electricity, basics of electrical circuits.• Magnetic field and electromagnetism.• Sources of electricity 1.• AC circuits, power in AC systems.• Sources of electricity 2• Control systems in electrical engineering and electronics.• Ship energy systems and electrical installations.• Electronic Components I• Electric drives of ships and floating objects.• Electronic components II• Measurements of non-electrical quantities and long-distance signal transmission.• Classification regulations in shipbuilding:• Electrical installations and control systems.• Basics of radio technology						
Prerequisites and co-requisites	The knowledge of mathematics and physics of university level						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
		50.0%			50.0%		
		50.0%			50.0%		

Recommended reading	Basic literature	
	Supplementary literature	
	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	<p>Description and solution electrical circuits. in the time domain and symbolic method.</p> <p>Impedance replacement of electrical circuits. Resonances in the electrical circuits</p> <p>Magnetic circuits - solving systems.</p>	
Work placement	Not applicable
