

Subject card

Subject name and code	Elements of Modern Physics, PG_00060667						
Field of study	Transport and Logistics						
Date of commencement of studies	October 2024	Academic year of realisation of subject				2026/2027	
Education level	first-cycle studies	Subject group				Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	3	Language of instruction				Polish	
Semester of study	6	ECTS credits				3.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Zakład Automatyki i Energetyki Morskiej -> Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Małgorzata Śmiatek-Telega					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		3.0		27.0	75
Subject objectives	N/A						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_K01] is aware of the need for continuous improvement in the field of the profession and knows the possibilities of further education	The student possesses the ability for self-learning.			[SK2] Assessment of progress of work		
	[K6_W02] has well structured knowledge of physics, including technical mechanics, fluid mechanics, solid state physics, optics and acoustics necessary to understand the basic physical phenomena occurring in transport	The student has knowledge in physics, including mechanics, thermodynamics, optics, electricity and magnetism, atomic physics, nuclear physics, solid-state physics, including the necessary knowledge to understand basic phenomena occurring in the environment.			[SW1] Assessment of factual knowledge		
	[K6_U01] can obtain information from literature, databases and other sources; verify and systematize the information obtained, interpret it and draw conclusions, formulate and justify opinions	The student can gather information from various sources: literature, databases, among others. They can integrate the acquired information, interpret it, draw conclusions, and formulate and justify opinions.			[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		

Subject contents	<p><b>Lecture:</b></p> <ol style="list-style-type: none"> <li>1. Vibrations and mechanical waves</li> <li>2. RLC circuits</li> <li>3. Electromagnetic waves</li> <li>4. Optics in wave terms</li> <li>5. Optics from a corpuscular perspective</li> <li>6. Elements of condensed phase physics</li> <li>7. Elements of atomic physics</li> <li>8. Elements of physics and nuclear energy</li> </ol> <p><b>Exercises:</b></p> <ol style="list-style-type: none"> <li>1. Vibrations</li> <li>2. Mechanical waves</li> <li>3. RLC circuits</li> <li>4. electromagnetic waves</li> <li>5. Optics</li> </ol> <p><b>Laboratory:</b></p> <ol style="list-style-type: none"> <li>1. Knowledge of the principles of operation of elements in an RLC circuit</li> <li>2. Knowledge of the principles of operation and the ability to connect a system containing a simple sensor</li> <li>3. Simple assembly of an electronic system that performs a given action</li> <li>4. Learning to program Arduino and other programs necessary for data visualization</li> </ol>														
Prerequisites and co-requisites	Fundamentals of differential calculus and geometry. Fundamentals of classical mechanics. Basic skills in programming														
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="456 954 794 981">Subject passing criteria</th> <th data-bbox="799 954 1137 981">Passing threshold</th> <th data-bbox="1142 954 1485 981">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 987 794 1014">Laboratory</td> <td data-bbox="799 987 1137 1014">50.0%</td> <td data-bbox="1142 987 1485 1014">30.0%</td> </tr> <tr> <td data-bbox="456 1021 794 1048">Lecture</td> <td data-bbox="799 1021 1137 1048">50.0%</td> <td data-bbox="1142 1021 1485 1048">40.0%</td> </tr> <tr> <td data-bbox="456 1055 794 1081">Problems</td> <td data-bbox="799 1055 1137 1081">50.0%</td> <td data-bbox="1142 1055 1485 1081">30.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Laboratory	50.0%	30.0%	Lecture	50.0%	40.0%	Problems	50.0%	30.0%
