

Subject card

| | | | | | | | |
|---|--|--|----------|-------------------------------------|--|------------|-----|
| Subject name and code | Technological process design, PG_00055055 | | | | | | |
| Field of study | Management and Production Engineering | | | | | | |
| Date of commencement of studies | October 2024 | Academic year of realisation of subject | | | 2025/2026 | | |
| Education level | first-cycle studies | Subject group | | | Obligatory subject group in the field of study Subject group related to scientific research in the field of study | | |
| Mode of study | Full-time studies | Mode of delivery | | | at the university | | |
| Year of study | 2 | Language of instruction | | | Polish | | |
| Semester of study | 3 | ECTS credits | | | 4.0 | | |
| Learning profile | general academic profile | Assessment form | | | exam | | |
| Conducting unit | Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | dr hab. inż. Mariusz Deja | | | | | |
| | Teachers | | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 15.0 | 0.0 | 15.0 | 15.0 | 0.0 | 45 |
| | E-learning hours included: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | SUM |
| | Number of study hours | 45 | | 6.0 | | 49.0 | 100 |
| Subject objectives | The ability to select technological processes for the production of typical machine parts. Design for manufacturing. | | | | | | |

| Learning outcomes | Course outcome | Subject outcome | Method of verification |
|-------------------|--|--|--|
| | [K6_U05] is able to prepare and present a presentation on the results of analysis of the tasks in the area of production engineering, is able to plan and carry out experiments, measurements, computer simulations and analyses and interpret the results and draw conclusions is able to use analytical methods, simulation and experiments for formulating and solving problems associated with production engineering | Simulation of specific manufacturing processes with the analysis of the obtained results. | [SU4] Assessment of ability to use methods and tools |
| | [K6_W03] has knowledge of the design record (the record structure) for the preparation of the manufacturing process documentation and basic knowledge of the implementation and management of production systems, including the principles of designing machine parts and manufacturing technologies using information techniques | Technological process planning with the use of computer systems, databases, and calculators for the selection of technological parameters. | [SW3] Assessment of knowledge contained in written work and projects |
| | [K6_U04] is able to develop documentation in the area of preparation, implementation and control of production processes in Polish and in a foreign language considered basic for scientific fields, is able to identify and formulate the basic objectives of quality management in the product life cycle, is able to use information and communication techniques appropriate to the implementation of tasks typical in engineering activities including preparation, production and supervision of the manufacturing process | Process planning for typical mechanical components. | [SU1] Assessment of task fulfilment |
| | [K6_W09] knows the general principles of creating and developing forms of individual entrepreneurship and stimulating employee creativity, using knowledge in the field of design, production and operation of machinery and technical devices | Determining manufacturing costs for specific production conditions. | [SW3] Assessment of knowledge contained in written work and projects |
| | [K6_W06] has knowledge of the life cycle of products and mechanical devices and systems, in the field of machine parts manufacturing techniques, as well as the possibilities and trends in the development of machines and production devices and process control | Analysis of the life cycle of a specific product with a high level of technological advancement. | [SW3] Assessment of knowledge contained in written work and projects |
| | [K6_K02] is able to interact and work in a group, assuming different roles, can inspire and organize the learning process of others, properly identifies priorities for realization of a task specified by themselves or others | Implementation of tasks related to planning the production process depending on the assigned function in the project group. | [SK1] Assessment of group work skills |

| Subject contents | <p>LECTURE The production process and its components. Data for the technological design process, documentation and technical time standard. Selection of machining allowances. Design of semi-finished products. Technological construction. Machining bases and rules for determining objects on machine tools and machining accuracy. Technological methods of shaping the surface layer of machine parts and their influence on operational properties. Technological processes of typical machine parts for various types and degrees of automation of machining and assembly. Process typification. Group processing. Flexible manufacturing systems. Computer-aided manufacturing. Programming of numerically controlled machine tools and robots. LABORATORY Determining the technical standard of time. Influence of machining bases and the way of setting the lathe on errors in machining the shaft. Technological analysis of shafts finishing by burnishing and grinding. Influence of hole processing technology on the accuracy of spacing their axes. Helical gear technology. Analysis of the assembly of machine components. Basics of programming and machining on CNC machine tools. PROJECT Designs of technological processes for typical machine parts: e.g. shaft and lever. Preparation of documentation, selection of: allowances, instrumentation, tools, technological parameters, determination of the technical standard of time.</p> | | | | | | | | | | | | | | |
|--|---|--|--|--------------------------|-------------------|-------------------------------|------|-------|-------|----------|-------|-------|------------------------------|-------|-------|
| Prerequisites and co-requisites | Engineering drawing, manufacturing processes | | | | | | | | | | | | | | |
| Assessment methods and criteria | <table border="1"> <thead> <tr> <th data-bbox="453 698 794 725">Subject passing criteria</th> <th data-bbox="799 698 1141 725">Passing threshold</th> <th data-bbox="1145 698 1492 725">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 732 794 759">Exam</td> <td data-bbox="799 732 1141 759">60.0%</td> <td data-bbox="1145 732 1492 759">30.0%</td> </tr> <tr> <td data-bbox="453 766 794 792">Projects</td> <td data-bbox="799 766 1141 792">80.0%</td> <td data-bbox="1145 766 1492 792">35.0%</td> </tr> <tr> <td data-bbox="453 799 794 826">Laboratory reports and tests</td> <td data-bbox="799 799 1141 826">80.0%</td> <td data-bbox="1145 799 1492 826">35.0%</td> </tr> </tbody> </table> | | | Subject passing criteria | Passing threshold | Percentage of the final grade | Exam | 60.0% | 30.0% | Projects | 80.0% | 35.0% | Laboratory reports and tests | 80.0% | 35.0% |
