

Subject card

Subject name and code	Programming Techniques, PG_00047554						
Field of study	Automatic Control, Cybernetics and Robotics						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Decision Systems and Robotics -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Marek Tatała					
	Teachers	dr inż. Marek Tatała mgr inż. Marek Grzegorek					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0	0.0	30
E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	2.0		18.0		50
Subject objectives	Learning the art of programming in C++ using dynamic structures, object-oriented programming and graphical environment for use in automation and robotics.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W04] knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devices	Student justifies implementation of specific data structures to solve given programming tasks. Student points and discusses fragments of code responsible for a specific functionality.			[SW2] Assessment of knowledge contained in presentation		
	[K6_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study	Student uses templates and dynamic data structures to solve given tasks.			[SU1] Assessment of task fulfilment		

Subject contents	<p>Project 1. Programming techniques in C++ using dynamic structures for applications in automation.</p> <p>a) Introduction and discussion of projects;</p> <p>b) Implementation of projects and consultations;</p> <p>c) Receive projects.</p> <p>Project 2. Object-oriented programming techniques using STL library for applications in automation.</p> <p>a) Introduction and discussion of projects;</p> <p>b) Implementation of projects and consultations;</p> <p>c) Receive projects.</p> <p>Project 3. Programming in a graphical environment - signal processing in robotics and automation.</p> <p>a) Introduction and discussion of projects;</p> <p>b) Implementation of projects and consultations;</p> <p>c) Receive projects.</p> <p>Project 4. Programming in a graphical environment - simulation and animation of automation and robotics.</p> <p>a) Introduction and discussion of projects;</p> <p>b) Implementation of projects and consultations;</p> <p>c) Receive projects.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
Recommended reading	Basic literature	Bruce Eckel "Thinking in C++", 2nd ed., 2006	
	Supplementary literature	Bruce Eckel "Thinking in C++", 2nd ed., 2006	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
