

## Subject card

Subject name and code	Artificial Intelligence - laboratory, PG_00047589						
Field of study	Automatic Control, Cybernetics and Robotics						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			1.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Decision Systems and Robotics -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Tomasz Białaszewski				
	Teachers		dr inż. Tomasz Białaszewski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	Understanding by the students of the basic branches of artificial intelligence with respect to their applications in automation and solution of selected problems during laboratory classes						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U07] can apply methods of process and function support, specific to the field of study	Student is able to solve the problems of artificial intelligence using the PROLOG language.  Student uses MATLAB toolbox to model of fuzzy control systems.			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	[K6_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information,n-selection and application of appropriate methods and toolsn	Student is able to design an appropriate artificial neural network in MATLAB environment for approximation, classification and prediction problems  Student uses the simulated annealing algorithm to solve optimization problems  Student implements the Bayes network to design of the decision system			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		

Subject contents	<ol style="list-style-type: none"> <li>1. The organization classes and rules for passing</li> <li>2. Programming in PROLOG - introduction</li> <li>3. Programming in PROLOG - the basic language constructs, unification, conversion</li> <li>4. Programming in PROLOG - control conversion, recursion</li> <li>5. Programming in PROLOG - are examples of the complex problems of artificial intelligence</li> <li>6. Modeling of fuzzy systems using MATLAB - Introduction</li> <li>7. Modeling of fuzzy systems using MATLAB - Sample applications</li> <li>8. Constructing learning and artificial neural networks in MATLAB - Introduction</li> <li>9. Constructing learning and artificial neural networks in MATLAB - Sample applications</li> <li>10. Machine Learning - examples of algorithms</li> <li>11. Machine Learning - implementation of simulated annealing algorithm</li> <li>12. Machine learning - implementation of a genetic algorithm</li> <li>13. Machine Learning - Algorithms construction of decision trees</li> <li>14. Bayesian Networks: Methods for calculating the probabilities</li> </ol>		
Prerequisites and co-requisites	A student should include the subject of Artificial Intelligence (lecture)		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Five tests, each of 45 minutes	51.0%	100.0%
