

## Subject card

Subject name and code	Wireless Technology in Automatic Control, PG_00047621						
Field of study	Automatic Control, Cybernetics and Robotics						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Radiocommunication Systems and Networks -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Krzysztof Cwalina					
	Teachers	dr inż. Krzysztof Cwalina					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	45	3.0		27.0		75
Subject objectives	Radio link structure and operation, typical applications for automatics.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W06] Knows and understands the basic processes occurring in the life cycle of devices, facilities and systems specific to a given field of study.	Knowledge of the radio-link structure and operation and the main exploitations conditions-important from the wireless steering and control systems design			[SK2] Assessment of progress of work [SW1] Assessment of factual knowledge [SU2] Assessment of ability to analyse information		
	[K6_W01] knows and understands, to an advanced extent, mathematics necessary to formulate and solve simple issues related to the field of study	The student learned the basics of radio communication theory and technique as well as the main functional conditions in the field of wireless communication development.			[SW3] Assessment of knowledge contained in written work and projects		
Subject contents	1. Introduction to wireless communications, functional scheme of a radio-link, short description of a radio-wave phenomena 2. Basic energetic description of the radio link, surface power density and electric field intensity of the radio wave 3. Radio transmitter equipment, functional scheme, exploitation characteristics 4. Radio receiver equipment, functional scheme, exploitation characteristics 5. Antenna equipment as frequency-space filter, impedance and directivity properties, exploitation parameters 6. Main antenna solutions, whip and halfwave dipole antennas, impedance and directivity properties 7. Basic radiowave propagation conditions, free and effective propagation space, LOS and NLOS conditions 8. Main range conditions, desirable and undesirable range 9. One and two directional work of radio link, simple and duplex kind of the work, radio network schemes, cellular structure of the network practical solutions 10. Frequency spectrum management, coordination distance, cellular cluster, role of the Electronic Communications Office (UKE) 11. Basic principles of the modulation technique, digital modulations, exploitation properties 12. Digital form of a radio link, general functional scheme, exploitation properties 13. Radio access basic protocol layer characteristics, protocols of ??? 14. Main standards of wireless solutions for remote steering and control applications 15. Final exam						
Prerequisites and co-requisites	No requirements						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Midterm colloquium	50.0%			70.0%		
	Practical exercise	50.0%			15.0%		
	Activity	0.0%			15.0%		

Recommended reading	Basic literature	Katulski R.J.: Propagacja fal radiowych w telekomunikacji bezprzewodowej, WKŁ, 2009
	Supplementary literature	No requirements
	eResources addresses	Adresy na platformie eNauczenie:
Example issues/ example questions/ tasks being completed	Not applicable	
Work placement	Not applicable
