

Subject card

Subject name and code	Introduction to Computer Networks, PG_00047632						
Field of study	Automatic Control, Cybernetics and Robotics						
Date of commencement of studies	October 2024	Academic year of realisation of subject				2026/2027	
Education level	first-cycle studies	Subject group				Optional subject group Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	3	Language of instruction				Polish	
Semester of study	5	ECTS credits				3.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Computer Communications -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Krzysztof Nowicki					
	Teachers	dr inż. Krzysztof Nowicki					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	3.0		27.0	75	
Subject objectives	Student becomes familiar with logical layered architectures, classifies basic networking problems and identifies and analyzes selected protocols and mechanisms implemented in standard LAN and WAN solution						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W03] knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum		Student is able to analyze and differentiate the work of selected systems and network devices.		[SW1] Assessment of factual knowledge		
	[K6_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study		The student is able to choose and apply appropriate methods and tools for building and evaluating the work of computer networks		[SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information		
Subject contents	1. Classification and general characteristics of computer networks 2. Layered network architectures - ISO / OSI, TCP / IP 3. Theoretical foundations of data transmission 4. Problems of designing the data link layer (synchronization, flow control, error detection and detection) 5. LAN networks - general characteristics - classification of access methods 6. Wired solutions of the competitive type: Ethernet networks - MAC layer functions and medium access rules - IEEE 802.3 standard 7. Wireless LANs - general characteristics 8. IEEE 802.11 standard - operating modes 9. Standard 802.11 - methods access 10. New technologies of Ethernet network 11. 10/40/100 Gb / s Ethernet 12. Methods of connecting LAN networks 13. Local virtual networks 14. Wide area computer networks - WAN networks 15. TCP / IP architecture - IP protocols and transport protocols 16 IPv6 protocols, addressing, 17. Migration of IPv4 / IPv6 18. Routing methods in WAN networks 19. Methods of preventing congestion in IP networks 20 Network Security						

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	lab.	50.0%	40.0%
	lec.	50.0%	60.0%
Recommended reading	Basic literature	Nowicki K., Woźniak J.: Przewodowe i bezprzewodowe sieci LAN, OW PW 2002	
	Supplementary literature	Tannenbaum A.: Computer Networks, Prentice Hall; Nowicki K.: Ethernet - sieci, mechanizmy, Infotech Nowicki K, Świątowski J.: Protokoły IPv6 Krawczyk H., Kaczmarek S., Nowicki K. - Aplikacje i usługi a technologie sieciowe, WN PWN 2018	
	eResources addresses	Adresy na platformie eNauzanie:	
Example issues/ example questions/ tasks being completed	Description of network architectures and basic standards. Comparison of standard wired and wireless LAN networks. Comparison of methods and devices for connecting networks. Description of addressing methods in LAN and WAN networks. Description and comparison of selected routing protocols and basic communication protocols in IP networks. Description of selected network applications.		
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
