

## 於。GDAŃSK UNIVERSITY 奶 OF TECHNOLOGY

## Subject card

| Subject name and code                       | Telecommunication Signals - laboratory, PG_00048137  |   |   |                |        |   |            |     |  |
|---|--|---|---|----------------|--------|---|------------|-----|--|
| Field of study                              | Electronics and Telecommunications   |   |   |                |        |   |            |     |  |
| Date of commencement of studies             | October 2024   |   | Academic year of realisation of subject   |                |        | 2026/2027   |            |     |  |
| Education level                             | first-cycle studies  |   | Subject group   |                |        | Optional subject group<br>Subject group related to scientific<br>research in the field of study |            |     |  |
| Mode of study                               | Full-time studies  |   | Mode of delivery  |                |        | at the university   |            |     |  |
| Year of study                               | 3  |   | Language of instruction   |                |        | Polish  |            |     |  |
| Semester of study                           | 6  |   | ECTS credits  |                |        | 1.0   |            |     |  |
| Learning profile                            | general academic profile   |   | Assessmer   | ssessment form |        |   | assessment |     |  |
| Conducting unit                             | Department of Radiocommunication Systems and Networks -> Faculty of Electronics, Telecommunications and Informatics  |   |   |                |        |   |            |     |  |
| Name and surname of lecturer (lecturers)    | Subject supervisor   |   | dr hab. inż. Jarosław Sadowski  |                |        |   |            |     |  |
|   | Teachers   |   | dr hab. inż. Jarosław Sadowski  |                |        |   |            |     |  |
| Lesson types and methods                    | Lesson type  | Lecture                                   | Tutorial  | Laboratory     | Projec | t   | Seminar    | SUM |  |
| of instruction                              | Number of study hours  | 0.0                                       | 0.0   | 15.0           | 0.0    |   | 0.0        | 15  |  |
|   | E-learning hours included: 0.0   |   |   |                |        |   |            |     |  |
| Learning activity and number of study hours | Learning activity  | Participation i<br>classes incluc<br>plan |   |                |        | Self-study  |            | SUM |  |
|   | Number of study hours  | umber of study 15                         |   | 1.0            |        | 9.0   |            | 25  |  |
| Subject objectives                          | Practical students acquaint with the characteristics of the signals that occur in the communication system.  |   |   |                |        |   |            |     |  |
| Learning outcomes                           | Course outcome   |   | Subject outcome   |                |        | Method of verification  |            |     |  |
|   | [K6_U05] can plan and conduct<br>experiments related to the field of<br>study, including computer<br>simulations and measurements;<br>interpret obtained results and<br>draw conclusions |   | Student performs measurements<br>of parameters of selected<br>components from<br>telecommunication links.       |                |        | [SU1] Assessment of task<br>fulfilment  |            |     |  |
|   | [K6_W35] Knows the concepts of<br>the technique of signal<br>transmission, operation of<br>telecommunications networks and<br>multimedia services and the rules<br>for providing them    |   | Student can explain principles of operation of components which are tested in laboratory.                       |                |        | [SW1] Assessment of factual knowledge   |            |     |  |
|   | [K6_W34] Knows the<br>characteristics of<br>telecommunications channels,<br>methods of securing information,<br>modulation systems, methods of<br>access to the channel.                 |   | Student can explain basic<br>parameters of communication<br>links and their relation to theory of<br>operation. |                |        | [SW1] Assessment of factual knowledge   |            |     |  |

| Subject contents   | 1. Investigation of Delta Modulated Signals with Syllabic Adaptation                                      |                                  |                               |  |  |  |  |
|--|---|----------------------------------|-------------------------------|--|--|--|--|
|  | 2. Measurement of Static Characteristics of PCM Encoding.   |                                  |                               |  |  |  |  |
|  | 3. Measurement of Dynamic Characteristics of PCM Encoding   |                                  |                               |  |  |  |  |
|  | 4. Investigation of DPCM Encoding   |                                  |                               |  |  |  |  |
|  | 5. Investigation of PSK and DPSK Signals  |                                  |                               |  |  |  |  |
|  | 6. Investigation of Single Side Band Modulated Signals  |                                  |                               |  |  |  |  |
|  | 7. Investigation of Balanced Mixer  |                                  |                               |  |  |  |  |
| Prerequisites<br>and co-requisites                             | No requirements   |                                  |                               |  |  |  |  |
| Assessment methods<br>and criteria                             | Subject passing criteria  | Passing threshold                | Percentage of the final grade |  |  |  |  |
|  | Practical exercise  | 50.0%                            | 90.0%                         |  |  |  |  |
|  | Activity  | 0.0%                             | 10.0%                         |  |  |  |  |
