[K7_W71] has general knowledge in humanistic, social, economic or legal sciences, including their fundamentals and applicationsThe student has general knowledge in the field of system implementation by operators[SW1] Assessment of factual knowledge[K7_W08] knows and understands, to an increased extent, the fundamental dilemmas of modern civilisation, the main development trends of scientific disciplines relevant to the field of educationThe student knows the main development trends of scientific disciplines relevant to the field of educationSW1] Assessment of factual knowledge[K7_W04] Knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programmable elements or systems using computers or such devicesThe student knows the principles, selected network solutions[SW1] Assessment of factual knowledge[K7_U71] is able to apply knowledge from humanistic, social, economic or legal sciencesStudent is able to define non- technical problems associated with the implementation of subject[SU3] Assessment of ability to use knowledge gained from the subject	Subject objectives	Presentation of the problems of organization of network work in the enterprise by academic teachers and company employees.								
in humanistic, social, economic or legal sciences, including their fundamentals and applicationsknowledge in the field of system implementation by operatorsknowledge[K7_W08] knows and understands, to an increased extent, the fundamental dilemmas of modern civilisation, the main development trends of scientific disciplines relevant to the field of educationThe student knows the main development trends of scientific disciplines relevant to the field of educationSW1] Assessment of factual knowledge[K7_W04] Knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programmable elements or systems using computers or such devicesThe student knows the principles, methods and techniques of selected network solutions[SW1] Assessment of factual knowledge[K7_U71] is able to apply knowledge from humanistic, social, economic or legal sciencesStudent is able to define non- technical problems associated with the implementation of subject[SU3] Assessment of ability to use knowledge gained from the subject	Learning outcomes	Course out	Subj	Subject outcome			Method of verification			
Understands, to an increased extent, the fundamental dilemmas of modern civilisation, the main development trends of scientific disciplines relevant to the field of educationdevelopment trends of scientific networksknowledge[K7_W04] Knows and understands, to an advanced extent, the principles, and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devicesThe student knows the principles, methods and techniques of selected network solutions (Ethernet, VoIP)[SW1] Assessment of factual knowledge[K7_U7] U71] is able to apply knowledge from humanistic, social, economic or legal sciencesStudent is able to define non- technical problems associated with the implementation of subject[SU3] Assessment of ability to use knowledge gained from the subject		in humanistic, social, economic or legal sciences, including their		knowledge in the field of system						
Understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devicesmethods and techniques of selected network solutions (Ethernet, VoIP)knowledge[K7_U71] is able to apply knowledge from humanistic, social, economic or legal sciencesStudent is able to define non- technical problems associated with the implementation of[SU3] Assessment of ability to use knowledge gained from the subject		[K7_W08] knows and understands, to an increased extent, the fundamental dilemmas of modern civilisation, the main development trends of scientific disciplines relevant to the field of		development trends of computer						
knowledge from humanistic, social, economic or legal sciences with the implementation of subject use knowledge gained from the		understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such		methods and techniques of selected network solutions						
systems by operators		knowledge from humanistic, social, economic or legal sciences in order to solve problems		technical problems associated with the implementation of systems by operators			use knowledge gained from the subject			
[K7_K71] is able to explain the need to apply knowledge from humanistic, social, economic or legal sciences in order to function in a social environmentThe student is able to explain the need to use knowledge of economic or legal sciences in functioning in a social environment[SK5] Assessment of ability to solve problems that arise in practice		need to apply knowledge from humanistic, social, economic or legal sciences in order to function		need to use knowledge of economic or legal sciences in			solve problems that arise in			
Subject contents Course content agreed with industry representatives every semester. In general, the content deals with the issues of introducing new ICT solutions	Subject contents	Course content agreed with industry representatives every semester. In general, the content deals with the issues of introducing new ICT solutions								

Prerequisites and co-requisites	Basic knowledge of computer networks					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Lecture	50.0%	100.0%			
Recommended reading	Basic literature	erature Materials provided by external companies and the lecturerer				
3	Supplementary literature	No requirements				
	eResources addresses	Adresy na platformie eNauczanie:				
Example issues/ example questions/ tasks being completed	Construction and implementation of the VoIP system Construction and implementation of CE systems					
Work placement	Not applicable
