

Subject card

Subject name and code	, PG_00059053								
Field of study	Environmental Engineering								
Date of commencement of studies	October 2024	Academic year of realisation of subject		2025/2026					
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study				
Mode of study	Part-time studies		Mode of delivery		at the university				
Year of study	2	Language of instruction		Polish					
Semester of study	4	ECTS credits		6.0					
Learning profile	general academic profile		Assessment form		exam				
Conducting unit	Department of Geotechnical and Hydraulic Engineering -> Faculty of Civil and Environmental Engineering -> Faculties of Gdańsk University of Technology								
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Dariusz Gąsiorowski						
Lesson types	Teachers								
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM		
	Number of study hours	20.0	20.0	0.0	0.0	0.0	40		
E-learning hours included: 0.0									
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM		
	Number of study hours	40		6.0		104.0	150		
Subject objectives	<p>Understanding a basic knowledge in the field of meteorology and hydrology at the level necessary for the environmental engineering specialist. Understanding of basic physical processes taking place in the atmosphere, such as the circulation of heat and humidity, moisture and cloud formation, precipitation formation, general atmosphere circulation.</p> <p>Understanding the basic hydrological processes occurring in the land phase of the cycle. Understanding the mechanisms of formation of the outflow from the catchment area, water flow in openchannels and in the ground.</p>								

Learning outcomes	Course outcome	Subject outcome	Method of verification												
	[K6_U15] can make interpretations of measured meteorological parameters, define basic elements characterizing the weather and climate	The student is able to use the data in the field of meteorology and hydrology to analyze the problems in environmental engineering.	[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools												
	K6_W12	The student gains the basic knowledge about meteorology and hydrology. The student understands the basic concepts related to the circulation of water and energy in the atmosphere and hydrosphere. The student understands the influence of the thermodynamic state of the atmosphere on the spread of pollutants.	[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge												
	[K6_U08] can use properly selected methods and devices of hydraulics and hydrology, enabling determination of basic quantities characterizing the flow of water in open channels and rivers, pipelines and flow objects of environmental engineering	The student is able to choose the appropriate method and tools to determine the necessary parameters characterizing the surface and subsurface flows.	[SU5] Assessment of ability to present the results of task [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment												
	[K6_W14] knows and understands the methods of measuring basic quantities characteristic for fluid mechanics and hydraulics, hydrology; knows the calculation methods and IT tools necessary to analyze the results of laboratory and field work	The student knows the rules for preparing hydrological studies and knows the available computational tools supporting the work of an engineer.	[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects												
	[K6_W01] has knowledge in the field of mathematics, including: linear algebra, mathematical analysis and elements of mathematical statistics, probability theory, applications of mathematics, including mathematical methods and numerical methods, necessary for: 1) description and analysis of hydrological phenomena; 2) description and analysis of meteorological phenomena; 3) solving project tasks of the sanitary industry;	The student is able to perform calculations related to the determination of the basic meteorological and hydrological parameters.	[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects												
Subject contents	Course content – lecture Tasks of meteorology. The weather and its typical elements. Measurements and meteorological observations. Atmosphere. The vertical structure of the atmosphere. The quantities that determine the physical state of the atmosphere. Thermal balance of the atmosphere and the Earth. The water vapor in the atmosphere. Condensation of water vapor. Atmospheric precipitation. Air pressure. Vertical and horizontal pressure gradient. Atmosphere dynamics. Global atmosphere circulation. Air masses. The main causes of weather changes. Methods of meteorological forecasting. Hydrological cycle, the principal processes determining the transport of water. Rainfall. Evaporation. Groundwater, infiltration. Runoff from catchment area, surface flow. Instantaneous Unit Hydrograph. River flow, water stage and discharge and rating curve. Snow melting, transport of the thermal energy in the river and lakes, ice phenomena.														
Prerequisites and co-requisites	Completing a course in mathematics, hydraulics and the basics of computer science.														
Assessment methods and criteria	<table border="1"> <thead> <tr> <th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr> </thead> <tbody> <tr> <td>Test - exercises</td><td>51.0%</td><td>10.0%</td></tr> <tr> <td>Task reports</td><td>60.0%</td><td>40.0%</td></tr> <tr> <td>Exam</td><td>51.0%</td><td>50.0%</td></tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Test - exercises	51.0%	10.0%	Task reports	60.0%	40.0%	Exam	51.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Test - exercises	51.0%	10.0%													
Task reports	60.0%	40.0%													
Exam	51.0%	50.0%
