

Subject card

Subject name and code	, PG_00059172						
Field of study	Mechanika gruntów i gruntoznawstwo						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2025/2026		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Geotechnical and Hydraulic Engineering -> Faculty of Civil and Environmental Engineering -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Krzysztof Szarf				
	Teachers		dr inż. Mariusz Wyroślak				
			dr inż. Krzysztof Szarf				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	5.0	15.0	0.0	0.0	35
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	35		6.0		84.0	125
Subject objectives	The aim of the class is to teach the students basics of soil mechanics and soil classification.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U16] can, when formulating and solving engineering tasks in environmental engineering, evaluate, select and apply appropriate methods and tools, recognize their non-technical aspects, including environmental, economic and legal aspects		Student is able to solve exercises on geotechnics using analytical methods		[SU1] Ocena realizacji zadania		
	[K6_W04] possesses elementary knowledge in the field of land mechanics, ground science, land reclamation and geotechnics; has basic knowledge about the composition of air, water and soil, environmental pollution and processes responsible for their formation and ways to reduce them, knows the principles and organization of sustainable water management		Student learnt soil mechanics in the scope of the course Student learnt soil classification in the scope of the course Student is knowledgeable about geotechnical problems		[SW1] Ocena wiedzy faktograficznej		
	[K6_K01] can think and act in a creative and enterprising way; can set priorities for the implementation of an individual or group task; understands the need for continuous training and professional responsibility for their activities and team		Student is aware of the role of soil in the engineering tasks Student is able to work in the laboratory in a team		[SK2] Ocena postępów pracy		

Subject contents	Lectures:1. Introduction to soil mechanics2. Water in soil3. Filtration. Freezing of soils4. Stresses in soil5. Compressability of soil6. Strength of soils -- shear strength7. Bearing capacity of shallow foundations8. Consolidation9. Lateral stresses in soil: earth pressure10. Geotechnical failures. Soil reinforcement11. Stability of slopesLaboratory classes:1. Macroscopic tests on coarse soils and on fine soils2. Physical quantities of coarse soils3. State of coarse soils -- density index4. State of fine soils -- consistency limits5. Filtration6. Granulometric curve of a coarse soil7. Experiment with the Proctor apparatus8. Experiments with the oedometer9. Soil strength testing using the triaxial apparatus and the direct shear apparatus Auditorial classes: 1. Physical quantities of soils 2. Water flow in soil 3. Stresses 4. Shear strength 5. Earth pressure		
Prerequisites and co-requisites	Basic knowledge of classical mechanics, mathematics, geology		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test	45.0%	50.0%
	laboratory work passed	100.0%	50.0%
	auditorial classes passed	100.0%	0.0%
Recommended reading	Basic literature	Arnold Verruijt, Soil Mechanics, TU Delft, 2012	
	Supplementary literature	Braja M. Das, Fundamentals of Geotechnical Engineering, Cengage Learning, 2012	
	eResources addresses	Supplementary https://enauczenie.pg.edu.pl/moodle/course/view.php?id=33423 - eNauczanie course (in Polish, winter semester 2023/2024)	
Example issues/ example questions/ tasks being completed	Lectures:Give a typical value of particle density of soilName the basic law describing the shear strength of soilWhat quantities are used in Darcy's Law? Laboratory:To perform every test in the laboratory. Prepare a lab report for each test. Test. Auditorial classes: Prepare and present vertical stress values in the soil profile attached		
Practical activities within the subject	Not applicable
