

。 GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Engineering geodesy II, PG_00044837							
Field of study	Geodesy and Cartography							
Date of commencement of studies	October 2024		Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study		
						Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	5		ECTS credits			4.0		
Learning profile	general academic profile		Assessment form			exam		
Conducting unit	Department of Geode	esy -> Faculty c	of Civil and Env	ironmental Eng	gineerin	g		
Name and surname	Subject supervisor							
of lecturer (lecturers)	Teachers							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	t	Seminar	SUM
	Number of study hours	15.0	15.0	15.0	0.0		0.0	45
	E-learning hours inclu	ided: 0.0		1				
Learning activity and number of study hours	Learning activity Participation ir classes include plan		didactic Participation in consultation hours		Self-study SUM		SUM	
	Number of study hours	45		6.0		49.0		100
Subject objectives	Student has the knowledge hot to make the standard geodetic measurements.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_W07] has a well-established knowledge and understands concepts in the field of engineering geodesy including the use of calculations and measurements methods carried out with the use of geodetic instruments and photogrammetric and remote sensing technologies related to geodetic support for investment, surveying and inventory measurements and photogrammetry with remote sensing [K6_U06] can solve geodetic tasks and select measurement methods for typical engineering tasks including the curvature of the Earth and the impact of gravity							
Subject contents	Attestation (certification), comparison (calibration) and periodical examination of the electromagnetic distance measuring instruments. Topographic survey conducting with the use of the polar survey and electronic tacheometers. Standards of taking the geodetic measurements. Eccentric measurements. Coordinates transfer. The rules of establishment of the detailed geodetic network. Coordinates transformation. The height measurements with the use of trigonometric leveling method.							
Prerequisites and co-requisites	Knowledge of the following subjects: :engineering drawing, computer science, mathematics I, geodesy I.							

Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade		
and criteria	Laboratories. Map compilation on the basis of the topographic survey conducted.	100.0%	20.0%		
	Workshops. To obtain the course credit of all the calculative tasks. To pass the end-term test (colloquium).	100.0%	20.0%		
	The final examination. Only students that obtained the course (laboratories and workshops) credits can take the examination. There are no part course credit.	50.0%	60.0%

	eResources addresses	Adresy na platformie eNauczanie:			
Example issues/ example questions/ tasks being completed	 Describe the trigonometric levelling on the short distances. The basic rule of the electronic distance measurements. Describe the technology of the coordinates transfer. Describe the basic work phases during the topographic survey conducting. 				
Work placement	Not applicable				

Document generated electronically. Does not require a seal or signature.
