

Subject card

Subject name and code	SPECIAL GEODETIC MEASUREMENTS B, PG_00044857						
Field of study	Geodesy and Cartography						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			6.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Geodesy -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	15.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		8.0		82.0	150
Subject objectives	Teaching students about standard geodetic work, including road and rail objects.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W07] has a well-established knowledge and understands concepts in the field of engineering geodesy including the use of calculations and measurements methods carried out with the use of geodetic instruments and photogrammetric and remote sensing technologies related to geodetic support for investment, surveying and inventory measurements and photogrammetry with remote sensing		get the ability to use the statistical analysis in the geodetic works of engineering measurements				
	[K6_K02] is ready to solve problems related to the profession of geodesy and cartography engineer and to assess risks and effects of the performed activity		get the ability to plan and conduct geodetic engineering tasks				
	[K6_W11] understands the concepts and has in-depth knowledge in the field of geodetic building monitoring, extended with basic knowledge in the field of statics and dynamics of engineering structures		get the ability to use the geometric levelling in the vertical displacements determination				

Subject contents	<p>Accuracy analysis using local estimators of variance coefficients.</p> <p>Free adjustment of vertical and horizontal networks.</p> <p>Technologies for determining the vertical displacements taking into account rail and road structures.</p> <p>Standards for taking measurements in railway geodesy.</p> <p>Trigonometric leveling in determining the height of the measurement's network points.</p>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 624 794 654">Subject passing criteria</th> <th data-bbox="799 624 1141 654">Passing threshold</th> <th data-bbox="1145 624 1490 654">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 660 794 734">practical classes – practical classes – getting the credit of obligatory tasks</td> <td data-bbox="799 660 1141 734">100.0%</td> <td data-bbox="1145 660 1490 734">0.0%</td> </tr> <tr> <td data-bbox="453 741 794 815">end-term test - subjects presented during the lectures, practical and lab classes (60 minutes)</td> <td data-bbox="799 741 1141 815">50.0%</td> <td data-bbox="1145 741 1490 815">100.0%</td> </tr> <tr> <td data-bbox="453 822 794 896">lab classes – practical classes – getting the credit of obligatory tasks</td> <td data-bbox="799 822 1141 896">100.0%</td> <td data-bbox="1145 822 1490 896">0.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	practical classes – practical classes – getting the credit of obligatory tasks	100.0%	0.0%	end-term test - subjects presented during the lectures, practical and lab classes (60 minutes)	50.0%	100.0%	lab classes – practical classes – getting the credit of obligatory tasks	100.0%	0.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
practical classes – practical classes – getting the credit of obligatory tasks	100.0%	0.0%													
end-term test - subjects presented during the lectures, practical and lab classes (60 minutes)	50.0%	100.0%													
lab classes – practical classes – getting the credit of obligatory tasks	100.0%	0.0%
