

Subject card

Subject name and code	ESSENTIALS OF STATISTICS, PG_00058397								
Field of study	Economic Analytics								
Date of commencement of studies	October 2024		Academic year of realisation of subject			2024/	2024/2025		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery		blended-learning				
Year of study	1		Language of instruction		Polish				
Semester of study	1		ECTS credits		5.0	5.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Statistics and Econometrics -> Faculty of Management and Economics								
Name and surname	Subject supervisor	dr inż. Agnieszka Wałachowska							
of lecturer (lecturers)	Teachers		dr inż. Agnieszka Wałachowska						
			dr inż. Krzysztof Świetlik						
			Olga Komorowska						
			dr Jarosław Krajewski						
Lesson types and methods	Lesson type Lecture		Tutorial Laboratory Project			t .	Seminar	SUM	
of instruction	Number of study hours	30.0	0.0	30.0	0.0		0.0	60	
	E-learning hours included: 30.0								
Learning activity and number of study hours	Learning activity	ctivity Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
Number of study hours		60		10.0		55.0		125	
Subject objectives	Selects an appropriate methodology for testing regularities occurring in mass processes, using statistical software to process data and interpret obtained results.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_W02] Demonstrates advanced knowledge of methods and techniques related to the field of study in economic analytics to explain complex problems.		formulates the problem appropriately, obtains the data, selects methods necessary for solving the given problem, and interprets the results correctly			[SW3] Assessment of knowledge contained in written work and projects			
	[K6_U07] Applies advanced information technologies to enhance data analysis and decision-making processes.		uses statistical software that facilitates the analysis of mass data and supports decision-making processes			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment

Subject contents	Population and sample
	Full and partial tests
	Random and non-random selection methods
	Classification of statistical characteristics
	Classification of statistical characteristics
	The concept of a random variable and basic information about distributions (discrete, continuous)
	Importance of measures of central tendency
	Differences between classic and positional measures
	Arithmetic mean, harmonic mean, median, dominant, quartiles, percentiles
	Importance of measures of variation
	Variance, standard deviation, coefficient of variation, quadrant deviation, positional coefficient of variation,
	range, decile range
	Box-and-whisker plot
	Box-and-willskel plot
	Importance of asymmetry measures
	Third central moment, asymmetry coefficient, positional asymmetry coefficient
	Examples of asymmetric distributions
	Importance of measures of distribution flattening
	mipotanio o modelio o della discimig
	Fourth central moment, kurtosis, positional concentration coefficient
	Statistical series
	Histogram
	Distributor
	Central Limit Theorem

	Time series					
	Time series of periods and moments Time series components (trend, seasonal, cyclical and random fluctuations)					
	The control of the co					
	Trend extraction (mechanical and analytical method)					
	Simple moving average					
	Simple moving average					
	Exponential smoothing					
	Modern methods of data visualization					
	INIOGERI MELITOUS OF GALA VISUALIZATION					
	Errors in test preparation Errors in conducting the study Errors in the preparation of research results					
	Inference errors					
Prerequisites						
and co-requisites Assessment methods	Cubiost passing seiteria	Donaing throat ald	Dercentors of the first and			
and criteria	Subject passing criteria tutorial exam II	Passing threshold 60.0%	Percentage of the final grade 50.0%			
	written exam	60.0%	50.0%			
Recommended reading	Basic literature					
	Barrow, M. (2017), Statistics for Economics, Accounting and Business					
	Studies, Harlow: Prentice Hall.

Example issues/	What is a statistical feature? Provide	e types of features and examples.		
example questions/	, , , , , , , , , , , , , , , , , , ,			
tasks being completed				
	The concept of general population and samples.			
	Calculation and interpretation of basic descriptive measures of distribution.			
	Knowledge of basic distributions of a random variable.			
	Transmissing of basic distributions of a	a random variable.		
	Correlation coefficient (calculation method, interpretation).			
	Assumptions of the Classical Linear	Regression Model (KMRL).		
	- · · · · · · · · · · · · · · · · · · ·			
	Time series components, trend analysis, measurement of seasonal fluctuations.			
	The series series and analysis, measurement of seasonal nationalis.			
	Simple methods of examining the dynamics of economic phenomena, absolute growth, relative growth.			
Work placement	Not applicable
