

Subject card

Subject name and code	DIPLOMA LABORATORY WORK, PG_00048972								
Field of study	Green Technologies								
Date of commencement of studies	October 2024		Academic year of realisation of subject			2025/2026			
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			English			
Semester of study	3		ECTS credits			5.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Energy Conversion and Storage -> Faculty of Chemistry								
Name and surname	Subject supervisor								
of lecturer (lecturers)	Teachers								
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	oject Seminar		SUM	
of instruction	Number of study hours	0.0	0.0	75.0	0.0		0.0	75	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	75				40.0		130	
Subject objectives	The aim of the course is to carry out the research needed to write a master's thesis.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K7_K03] can consciously and supported by the experience to present your work, provide information in a manner commonly understood, to communicate, to make self-assessment and constructive criticism of the work of others, the reasons for different points of view		The graduate student is able to present the effects of his work in an understandable and clear manner. Can critically evaluate his / her work and formulate proposals for solving existing problems.						
	able to think and act in a creative and enterprising, has the ability to negotiate, is aware of its own limitations and know when to ask the experts [K7_W01] a broader and deeper knowledge of certain branches of		The graduate student is able to work in a group and assess his skills in terms of the tasks performed. He asks for help in case of problems in the implementation of the entrusted functions. Has the knowledge to create a research plan and solve existing						
	mathematics, including elements of applied mathematics and optimization methods including mathematical methods, useful to formulate and solve complex tasks in the field of environmental technologies and modern analytical methods		problems.						

Data wydruku: 18.07.2024 10:20 Strona 1 z 2

Subject contents	- preparation of a research plan							
	- preparation of the stand and samples							
	- carrying out research							
	- analysing the results							
Prerequisites and co-requisites								
•								
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade					
	Implementation of the research plan	60.0%	100.0%					
Recommended reading	Basic literature	- Fthenakis, V. M., Duby, P., Wang, W., Graves, C., & Belova, A.						
recommended reading		(2006). Recycling of CdTe Photovoltaic Modules: Recovery of						
		Cadmium and Tellurium. 21st European Photovoltaic Solar Energy Conference, 25392541.						
		- Sinha, P. (2013). Life cycle materials and water management for CdTe photovoltaics. Solar Energy Materials and Solar Cells, 119, 271275.
