Subject card

Subject name and code	Medical Imaging, PG_00047805					
Field of study	Biomedical Engineering					
Date of commencement of studies	October 2024		Academic year of realisation of subject	2025/2026		
Education level	first-cycle studies		Subject group	Obligatory subject group in the field of study		
				Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery	at the university		
Year of study	2		Language of instruction	Polish		
Semester of study	4		ECTS credits	5.0		
Learning profile	general academic profile		Assessment form	exam		
Conducting unit	Department of Biomedical Engineering -> Faculty of Electronics, Telecommunications and Informatics					
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Jerzy Wtorek				
	Teachers	prof. dr hab. inż. Jerzy Wtorek				

Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	45	16.0	64.0	125

Subject objectives	To familiarize students with the construction and principles of operation of the basic equipment used for imaging in medicine.

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U53] can apply equipment used in biomedical diagnostics	The student gained skills of distinguishing between image formation modalities	[SU3] Assessment of ability to use knowledge gained from the subject
	[K6_W54] Knows and understands, to an advanced extent, selected aspects of biomedical diagnostics	The student gained knowledge of the various forms of energy and the impact on matter and on living organisms	[SW1] Assessment of factual knowledge
	[K6_W04] knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devices	The student gained knowledge of the relevant stages of construction of medical images including the theoretical basis of this process	[SW1] Assessment of factual knowledge
	[K6_W02] knows and understands, to an advanced extent, selected laws of physics and physical phenomena as well as methods and theories explaining the complex relationships between them, constituting the basic general knowledge in the field of technical sciences related to the field of study	The student gained knowledge about the measurement methods used in various imaging techniques for functional and structural diagnosis	[SW1] Assessment of factual knowledge

Subject contents	1 imaging, basic concepts, PSF, 2 Ultrasound (U.S.), the basic concepts, 3 Mechanical properties of materials (biological), 4. Generation of U.S., measurement, methods, materials, 5 Application of U.S. for measuring flow, methods, 6 . imaging using ultrasound, heads, 7 ultrasound (USG), construction, 8.EM radiation, X, Interaction of X-rays with matter, 9. eneration and measurement of X-ray Camera 10 X-ray, mammography, 11 Fundamentals of X-ray tomography , CT, 12. CT - block diagram, 13. Nuclear Magnetic Resonance, 14 MRI sequences 15 MRI tomograph15. Block diagram 16 MRI - data acquisition, 17 Fundamentals of nuclear medicine , photomultiplier, camera, 18 Isotopes, 19 Collimation and collimators, 20 SPECT, PET 21, 22 Optical imaging, microscopy 23, 24 Endoscopy, 25 Diffusion Optical tomography, 26. Optical coherence tomography, 27. Imaging of sources, 28. impedance tomography, 29. Multimodal imaging, CT-SPECT, CT - PET, MRI - EIT 30. Fundamentals of thermography
Prerequisites and co-requisites	Backgrounds of mathematics and physics

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Egzamin	60.0%	40.0%
	sprawozdania	60.0%	60.0%
