|  | Number of study hours  | 30                                | 4.0   |  | 41.0                          |   | 75      |     |
| Subject objectives                             | To show experimental aspects of atomic and nucelar physics   |                                   |   |  |                               |   |         |     |
| Learning outcomes                              | Course outcome Subject outcome Method of verification  |                                   |   |  |                               |   |         |     |
|  | [K6_U05] can plan and conduct<br>experiments related to the field of<br>study, including computer<br>simulations and measurements;<br>interpret obtained results and<br>draw conclusions   |                                   | The student gains the ability to<br>conduct experiments with the use<br>of radioactive isotopes. Can<br>correctly present measurement<br>data and assess measurement<br>uncertainties. Can correctly<br>interpret the results and draw<br>conclusions.  |  |                               | [SU1] Assessment of task<br>fulfilment  |         |     |
|  | [K6_U02] can perform tasks<br>related to the field of study in an<br>innovative way as well as solve<br>complex and nontypical problems,<br>applying knowledge of physics, in<br>changing and not fully predictable<br>conditions  |                                   | Student obtains knowledge of the<br>physics course, especially nuclear<br>physics. The student acquires the<br>ability to analyze the phenomena<br>occurring with the participation of<br>ionizing radiation. The student is<br>able to use simple physical<br>models in relation to more<br>complex systems. |  |                               | [SU1] Assessment of task<br>fulfilment  |         |     |
| Subject contents                               | Investigation of stochastic processes with the use of spark-discharge detector. Measurement of the range of alfa particles in air with the use of ionizing chamber. Investigation of sample activation in neutron beam Measurement of half-time of radioactive decay in cascade processes. Measurement of absorption coefficient for gamma radiation in selected materia |                                   |   |  |                               |   |         |     |
| Prerequisites<br>and co-requisites             | Physics - elementary course Physics od atomic nucleus and particles (08837)  |                                   |   |  |                               |   |         |     |
| Assessment methods<br>and criteria             | Subject passing criteria   |                                   | Passing threshold   |  | Percentage of the final grade |   |         |     |
