

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	BSc Diploma Project I, PG 00047936							
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering							
Date of commencement of studies	October 2024		Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	6		ECTS credits		2.0			
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Department of Biomedical Engineering -> Faculty of Electronics, Telecommunications and Informatics							
Name and surname of lecturer (lecturers)	Subject supervisor							
	Teachers							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project		Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0		0.0	30
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	30		5.0		15.0		50
Subject objectives	Preparing the student for the implementation of the diploma project, and then systematically monitoring the progress of his own work during the implementation of the project, giving him consultation, advice and guidance. Checking the practical effects of design work.							

assess possessed knowledge and acknowledge the importance of knowledge in solving cognitive and practical problems knowledge, justifies the need and motivation for implementing an engineering project.   Subject contents Content in accordance with the project charter.   Prerequisites Prerequisites	Learning outcomes	Course outcome	Subject outcome	Method of verification				
individual and team work project planning tools and monitoring its progress. In the case of team work, it is able to create and adhere to teamwork schedules, with the division of tasks between individual contractors. present the results of task [SU1] Assessment of task fulfilment   IK6_K03] is ready to meet social obligations, co-organise activitize for the social environment, initiate actions for the public interest, think and act in an entrepreneurial way ISK4] Assessment of communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in practice   IK6_U05] can plan and conduct experiments related to the field of study, including computer simulations and measurements; interpret obtained results and draw conclusions Creates concepts for solving project-related problems in the area of biomedical engineering. Is able to analyze the problem in terms of toils and methods useful to solve it. [SU1] Assessment of task fulfilment   IK6_K02] is ready to critically assess possessed knowledge and acknowledge in solving cognitive and practical problems Prepares a review of the state of knowledge in solving cognitive and practical problems [SK2] Assessment of progress of work   Subject contents Content in accordance with the project charter. Prepares a review of the state of knowledge in solving cognitive and practical problems [SK2] Assessment of progress of work		formulating specifications of engineering tasks related to the field of study and solving these tasks, can:n- apply analytical, simulation and experimental methods,n- notice their systemic and non-technical aspects,n- make a preliminary economic assessment of suggested	simulation environments, software development environments, text editing and presentation tools. Demonstrates the ability to plan design work taking into account	use methods and tools [SU5] Assessment of ability to				
obligations, co-organise activities for the social environment, initiate actions for the public interest, think and act in an entrepreneurial waytechnological significance of the solution and the path to achieving it.communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in practice[K6_U05] can plan and conduct experiments related to the field of study, including computer interpret obtained results and draw conclusionsCreates concepts for solving project-related problems in the area of biomedical engineering. Is able to analyze the problem in terms of tools and methods useful to solve it.[SU1] Assessment of task fulfilment[K6_K02] is ready to critically assess possessed knowledge and acknowledge the importance of knowledge in solving cognitive and practical problemsPrepares a review of the state of nowledge, justifies the need and motivation for implementing an engineering project.[SK2] Assessment of progress of workSubject contentsContent in accordance with the project charter.Prerequisites			project planning tools and monitoring its progress. In the case of team work, it is able to create and adhere to teamwork schedules, with the division of tasks between individual	present the results of task [SU1] Assessment of task				
experiments related to the field of study, including computer simulations and measurements; interpret obtained results and draw conclusions project-related problems in the area of biomedical engineering. Is able to analyze the problem in terms of tools and methods useful to solve it. fulfilment   [K6_K02] is ready to critically assess possessed knowledge and acknowledge the importance of knowledge in solving cognitive and practical problems Prepares a review of the state of knowledge, justifies the need and motivation for implementing an engineering project. [SK2] Assessment of progress of work   Subject contents Content in accordance with the project charter. Preprequisites		obligations, co-organise activities for the social environment, initiate actions for the public interest, think and act in an entrepreneurial	technological significance of the solution and the path to achieving	communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in				
assess possessed knowledge and acknowledge the importance of knowledge in solving cognitive and practical problems knowledge, justifies the need and motivation for implementing an engineering project.   Subject contents Content in accordance with the project charter.   Prerequisites Prerequisites		experiments related to the field of study, including computer simulations and measurements; interpret obtained results and	project-related problems in the area of biomedical engineering. Is able to analyze the problem in terms of tools and methods useful					
Prerequisites		assess possessed knowledge and acknowledge the importance of knowledge in solving cognitive	knowledge, justifies the need and motivation for implementing an	[SK2] Assessment of progress of work				
Prerequisites	Subject contents	Content in accordance with the project charter.						
and co-requisites								
	Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria Project 50.0% 100.0%		Project	50.0%	100.0%				
Recommended reading Basic literature Content in accordance with the project charter.	Recommended reading	Basic literature	Content in accordance with the project charter.					
Supplementary literature   Content in accordance with the project charter.		Supplementary literature	Content in accordance with the project charter.
