

Subject card

Subject name and code	Protection of the atmosphere and the climate, PG_00061704									
Field of study	Recycling and Energy Recovery									
Date of commencement of studies	October 2024	Academic year of realisation of subject		2024/2025						
Education level	first-cycle studies	Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study						
Mode of study	Full-time studies	Mode of delivery		at the university						
Year of study	1	Language of instruction		Polish						
Semester of study	2	ECTS credits		1.0						
Learning profile	general academic profile	Assessment form		assessment						
Conducting unit	Department of Environmental Engineering Technology -> Faculty of Civil and Environmental Engineering									
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Magda Kasprzyk								
	Teachers									
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar				
	Number of study hours	10.0	10.0	0.0	0.0	20				
E-learning hours included: 0.0										
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		SUM				
	Number of study hours	20		1.0		25				
Subject objectives	The aim of the course is to provide an introduction to the principles of atmospheric protection, emissions and the challenges posed by climate change.									
Learning outcomes	Course outcome		Subject outcome		Method of verification					
	[K6_U02] solves engineering issues and problems in the area of raw materials and energy recovery through the use of appropriate analytical, numerical and experimental tools and methods.		The student solves engineering issues and problems in the area of resource and energy recovery by applying appropriate and relevant analytical, numerical and experimental tools and methods.		[SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information					
	[K6_K03] is committed to independent lifelong learning and independently follows the development of science and technology, especially in the area of recycling raw materials and energy.		The student engages in independent lifelong learning and independently follows developments in science and technology, especially in the area of resource and energy recovery.		[SK2] Assessment of progress of work [SK4] Assessment of communication skills, including language correctness					
	[K6_W02] analyzes engineering and technological issues and problems in the area of raw materials and energy recovery using appropriate and appropriate analytical, numerical and experimental tools and methods		The student analyses engineering and technological issues and problems in the area of resource and energy recovery using appropriate and relevant analytical, numerical and experimental tools and methods.		[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects					
Subject contents	1. The atmosphere (composition and properties of the air, vertical structure of the atmosphere). Types, causes and sources of atmospheric air pollution. Human activity as a source of greenhouse gas emissions. 2.State of air quality in Poland and Europe. 3.Changes in climate of anthropogenic origin. 4.Main effects of climate change. Negative impact on the ocean. 5.Climate extremes and the effects on humans.									
Prerequisites and co-requisites										
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade					
	60.0%		50.0%		50.0%					
		60.0%		50.0%

	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed		Explanation of terms and differences: emission, immission, dry deposition, wet deposition, classical smog, photochemical smog. The additional greenhouse effect. Sources of carbon and how it circulates in nature. Radiative forcing, feedback. Adaptation and mitigation of climate change.
Work placement		Not applicable
