| Name and surname of lecturer (lecturers)    | Subject supervisor  | dr inż. Bożena Kotarska-Lewandowska                                    |  |                                     |                               |                                       |     |
|   | Teachers  | dr inż. Anna Sobieraj-Żłobińska<br>dr inż. Bożena Kotarska-Lewandowska |  |                                     |                               |                                       |     |
| Lesson types and methods of instruction     | Lesson type   | Lecture  | Tutorial   | Laboratory                          | Project                       | Seminar                               | SUM |
|   | Number of study hours   | 12.0   | 10.0   | 0.0                                 | 5.0                           | 0.0                                   | 27  |
|   | E-learning hours included: 0.0  |  |  |                                     |                               |                                       |     |
| Learning activity and number of study hours | Learning activity   | Participation in didactic classes included in study plan               |  | Participation in consultation hours |                               | Self-study                            | SUM |
|   | Number of study hours   | 27   |  | 5.0                                 |                               | 70.0                                  | 102 |
| Subject objectives                          | Preparation for recording engineering structures in a technical drawing, projection principles. Presentation of basic constructions in geometric projections (Monge projection, topographic projection). Getting knowledge how to use geometry to solve basic engineering problems        |  |  |                                     |                               |                                       |     |
| Learning outcomes                           | Course outcome  |  | Subject outcome  |                                     |                               | Method of verification                |     |
|   | [K6_W04] Knows the rules of descriptive geometry and technical drawing for preparing and reading architectural, construction and geodetic drawings; also with the use of CAD  |  | knows the basics of the topographic and Monge projection   |                                     |                               | [SW1] Assessment of factual knowledge |     |
|   | [K6_U04] Reads and prepares construction documentation (including drawings, graphic documentation in the CAD environment), efficiently uses maps as well as architectural, construction and geodetic drawings.  |  | can read construction drawings, can apply the basics of the topographic and ortographic projection |                                     |                               | [SU1] Assessment of task fulfilment   |     |
| Subject contents                            | Topographic projection. Lines and planes in topographic projection. Spacial relations and common elements. Design of slopes, embankments and excavations for squares and roads.   |  |  |                                     |                               |                                       |     |
|   | Monge projection. Location of a point, line and plane in space. Mutual position of lines and planes. Common elements (intersection line). Basic constructions. Transformation and its applications. Projection of polyhedra. Intersection of polyhedrons with a straight line or a plane. |  |  |                                     |                               |                                       |     |
| Prerequisites and co-requisites             |   |  |  |                                     |                               |                                       |     |
| Assessment methods and criteria             | Subject passing criteria  |  | Passing threshold  |                                     | Percentage of the final grade |                                       |     |
|   | ocena kolokwium   |  | 60.0%  |                                     | 50.0%                         |                                       |     |
|   | ocena arkuszy   |  | 60.0%  |                                     | 50.0%                         |                                       |     |
