

Subject card

Subject name and code	, PG_00064624						
Field of study	Civil Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group					
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Engineering Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Ewelina Korol					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	0.0	0.0	20.0	0.0	40
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	40	0.0		0.0		40
Subject objectives	Acquiring knowledge in the field of design and construction of buildings, in particular residential construction. Acquisition of knowledge in the field of running and managing construction works. Acquaintance with technologies and principles of construction organization, computer techniques and modern technologies. Develop the ability to identify significant problems related to the construction industry. Preparation of the graduate to work in independent positions and teamwork and education at the second degree of study						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U04] Reads and prepares construction documentation (including drawings, graphic documentation in the CAD environment), efficiently uses maps as well as architectural, construction and geodetic drawings.	The student can make necessary technical drawings: architectural and constructional in CAD environment			[SU4] Assessment of ability to use methods and tools		
	[K6_U03] Design engineering objects and details, processes and engineering systems by applying appropriate standards and methods of design.	The student knows the rules of constructing and designing structural elements made of: metal, reinforced concrete, wood, bricks			[SU1] Assessment of task fulfilment		
	[K6_W03] Demonstrate knowledge and understanding of the processes, established standards and design methods in the civil engineering subject area and of their limitations.	The student can design selected elements and typical masonry, reinforced concrete and steel structures, based on applicable eurocodes			[SW1] Assessment of factual knowledge		
Subject contents	The lectures present the content related to the polish construction rules and technical conditions. Then, current knowledge about the techniques of building objects is presented, commonly used building materials and types of structural systems.						
	The project contains of a set of architectural and construction drawings for a residential multi-family building with masonry walls and prefabricated ceilings, in CAD technology.						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test	60.0%	50.0%
	project	60.0%	50.0%
