

。 GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Lean Management, PG_00064719								
Field of study	Management and Production Engineering								
Date of commencement of studies	February 2025		Academic year of realisation of subject			2024/2025			
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	1		ECTS credits			4.0			
Learning profile	general academic profile		Assessmer	ent form			exam		
Conducting unit	Katedra Inżynierii Zarządzania i Jakości -> Faculty of Management and Economics								
Name and surname	Subject supervisor	dr inż. Joanna Czerska							
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	30.0	30.0	0.0	0.0		0.0	60	
	E-learning hours included: 0.0								
	Additional information: Non-computer simulation game, team and individual work, interactive lectures.								
Learning activity and number of study hours	dy hours Learning activity Participation in didact classes included in st plan					Self-study		SUM	
	Number of study hours	60		9.0		31.0		100	
Subject objectives	The concept of Lean increasing number of students to the world Production System) a leaders desired by the	companies.Th of managemer and to support s	erefore, the ain at concept base students in dev	n of the Lean N ed on the Toyot eloping skills th	/lanager ta Produ	ment co uction S	urse is to intr ystem (TPS	roduce Toyota	

Course outcome	Subject outcome	Method of verification				
[K7_U01] uses known analytical, simulation and experimental methods as well as mathematical models to analyze and evaluate stationary and non-stationary technological and production systems/processes with continuous and discrete operation	The student is able to perform value stream mapping using the Makigami method, identify losses in the process, prioritize and plan improvement actions.	[SU1] Assessment of task fulfilment				
[K7_U12] dvelops her/his own potential and independently plans own, lifelong learning, while also being able to guide others in this regard	The student creates their development plan in relation to the subject and keeps a journal of reflections on the progress of this development. The development plan includes soft, managerial and hard skills. Knows the principles of Lean Thinking and uses them.	[SU1] Assessment of task fulfilment				
[K7_W03] demonstrates structured and theoretically based knowledge covering key issues in the field of Management and Production Engineering enabling the design and synthesis of stationary and non-stationary systems, devices and technological processes with continuous and discrete operation	The student has knowledge of leadership in accordance with the principles of lean management and end-to-end process analysis in order to improve processes and jobs in these processes.	[SW1] Assessment of factual knowledge				
[K7_K01] is aware of the importance and understanding of non-technical aspects and effects of engineering/production activities, including its impact on the environment and the related responsibility for decisions made, demonstrating knowledge of actions aimed at reducing risk and anticipating the social and environmental effects of engineering/production activities	The student is able to indicate the role of team values, teamwork and communication in the implementation of changes in the processes in which people work. The student is able to define the values that guide them, develop team values and define attitudes that reflect these values.	[SK2] Assessment of progress of work				
 History of Toyota Production System Fundamental principles of Lean Management Lean Leadership and its key elements (work based on values, hoshin kanri, kaizen of employees and processes) My development plan. My reflections. Process improvement based on daily management (simulation game) Value stream mapping using the Makigami method Methods of engaging employees in changes Lean Taboo. Lean competency management. 						
Subject passing criteria	Passing threshold	Percentage of the final grade				
Mini team projects	60.0%	40.0%				
Exam	60.0%	20.0%				
Theoretical quizzes	60.0%	20.0%				
My development plan	60.0%	20.0%
