

Subject card

Subject name and code		Exploitation of mechatronics devices, PG_00064785						
Field of study		Mechatronics						
Date of commencement of studies		February 2025	Academic year of realisation of subject			2024/2025		
Education level		second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study		Full-time studies	Mode of delivery			at the university		
Year of study		1	Language of instruction			Polish		
Semester of study		1	ECTS credits			5.0		
Learning profile		general academic profile	Assessment form			exam		
Conducting unit		Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)		Subject supervisor		dr hab. inż. Ryszard Jasiński				
		Teachers		dr hab. inż. Ryszard Jasiński dr inż. Paweł Załuski				
Lesson types and methods of instruction		Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
		Number of study hours	20.0	0.0	20.0	20.0	0.0	60
		E-learning hours included: 0.0						
Learning activity and number of study hours		Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
		Number of study hours	60	16.0		49.0	125	
Subject objectives		To familiarize students with the operation of typical mechatronic devices.						
Learning outcomes		Course outcome	Subject outcome			Method of verification		
		[K7_W01] explains and describes, based on general knowledge in the field of scientific disciplines forming the theoretical foundations of Mechatronics, the construction and principles of operation of mechatronic systems, processes and their components, as well as methods and means of their integration	Student is able to identify and formulate a specification of tasks in the design and operation of mechatronic devices. Student explains and describes, based on general knowledge of the scientific disciplines that form the theoretical foundations of mechatronics, the structure and principles of operation of mechatronic systems and processes, and the operation of mechatronic devices.			[SW3] Assessment of knowledge contained in written work and projects		
		[K7_W11] interprets social, economic, legal (including industrial and intellectual property laws), and other non-technical aspects of engineering activities, and includes them into engineering practice	Student understands the need to formulate and provide the public with information and opinions regarding the operation of mechatronic devices.			[SW3] Assessment of knowledge contained in written work and projects		
		[K7_K11] is aware of importance of professional acting, the need for critical verification of acquired knowledge and consulting experts opinion in case of facing difficulties with individual problem solving	The student uses expert sources and critically evaluates solutions applied in mechatronic systems and during its operation.			[SK1] Assessment of group work skills [SK5] Assessment of ability to solve problems that arise in practice		

Subject contents	Introduction to the operation of mechatronic devices. Diagnostics of hydraulic (hydrotronic) systems. Measurement systems. Hydraulic fluids - operation of hydraulic (hydrotronic) systems. First start-up of a hydraulic (hydrotronic) system. Cleaning the hydraulic (hydrotronic) system from contamination (flushing the hydraulic system). Operation of hydraulic (hydrotronic) devices and systems in various environmental conditions. Methods for determining the areas of parameters for correct or incorrect operation of the hydraulic (hydrotronic) unit and system. Safe start-up and operation of mechatronic machines and devices. Directives on machine safety and user labor protection. Responsibility for a dangerous product. Hazard identification. Safe design. Technical protective measures. Safe work with mechatronic devices and systems.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		56.0%	25.0%
		56.0%	50.0%
		56.0%	25.0%
