

Subject card

Subject name and code	Projects and teams management, PG_00064789							
Field of study	Mechatronics							
Date of commencement of studies	February 2025		Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Humanistic-social subject group		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	1		Language of instruction			Polish		
Semester of study	1		ECTS credits		1.0			
Learning profile	general academic profile		Assessme	Assessment form		assessment		
Conducting unit	Zakład Maszyn Przepływowych -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology							
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Marzena Banaszek					
	Teachers							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	15.0 0.0		0.0	15
	E-learning hours included: 0.0							
Learning activity and number of study hours				Participation in consultation hours		Self-study		SUM
	Number of study hours	15		2.0		8.0		25
Subject objectives	The subject aims to: stages of a project, i. evaluation, develop s	e. from project	initiation throu	igh planning an	d execu	tion to p	oroject contro	ol and

Learning outcomes Course outcome		Subject outcome	Method of verification			
	[K7_K13] is ready for responsible performance of proffesional roles, considering ever-changing need of the society, including self developement and supporting and fullfiling work ethics	The student is aware of acting in a professional manner and observing the principles of professional ethics. The student critically evaluates the knowledge he/she has and is able to select appropriate methods of teaching himself/herself and others, is ready to supplement knowledge throughout life using various sources of knowledge.	[SK1] Assessment of group work skills [SK3] Assessment of ability to organize work [SK5] Assessment of ability to solve problems that arise in practice			
	[K7_W13] explains the main principles of individual and teamwork organization, including various forms of entrepreneurship utilizing knowledge from the field of engineering and technical sciences and disciplines relevant to the course of study	The student uses various methods of solving design problems. Is able to assess their own and others' competences in order to create teams to achieve design goals and tasks. Is able to select appropriate methods of implementing design work, is able to allocate resources to tasks taking into account the project schedule, supports group work in the implementation of projects, is able to demonstrate entrepreneurship and innovation in the implementation of tasks.	[SW3] Assessment of knowledge contained in written work and projects			
	[K7_K12] is ready for fullfiling social commitement and initation of actions for public interest including entrepreneurial thinking and acting	The student is aware of the importance of knowledge in solving cognitive and practical problems. Is ready to fulfill social obligations, inspire and organize activities for the benefit of the social environment. The student is aware of the importance of initiating activities for the public interest, thinking and acting in an entrepreneurial manner, responsible performance of professional roles taking into account changing social needs, including developing the achievements and maintaining the ethos of the profession, observing and developing the principles of professional ethics and acting to comply with these principles.	[SK1] Assessment of group work skills [SK5] Assessment of ability to solve problems that arise in practice			
Subject contents	Development of the project concept (project idea and objective, project nature, time frame). Identification of risk and risk management in projects (analysis of opportunities and threats for the project). Creation of a project team. Delegation of tasks in the project (identification of tasks in the project, division of responsibilities, rights and competences of project employees). Communication in the project team (principles and styles of management, motivating and inspiring project employees, conflicts in project teams, techniques for responding to conflicts). Project documentation. Project implementation schedule. Creation of the project budget and determination of its financing sources (determination of direct and indirect project costs, internal and external sources of project financing). Monitoring and control of project implementation.					
Prerequisites and co-requisites						
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Development of the project charter and implementation of the project	50.0%	100.0%
