

Subject card

Subject name and code	Robotics and haptics systems, PG_00064803						
Field of study	Mechatronics						
Date of commencement of studies	February 2025	Academic year of realisation of subject			2025/2026		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Michał Mazur					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	The aim of the subject is to familiarize students with the construction, application and principle of operation of haptic systems used in robotics.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_W04] demonstrates knowledge encompassing selected issues in the field of detailed knowledge, particularly in the scope of methods, techniques, tools, and algorithms specific to Mechatronics	Demonstrates knowledge of issues related to the application of haptic systems in robotics.	[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge
	[K7_K12] is ready for fulfilling social commitment and initiation of actions for public interest including entrepreneurial thinking and acting	He is ready to present haptics and robotics solutions for the public interest.	[SK5] Assessment of ability to solve problems that arise in practice [SK4] Assessment of communication skills, including language correctness [SK3] Assessment of ability to organize work [SK2] Assessment of progress of work [SK1] Assessment of group work skills
	[K7_U12] develops her/his own potential and independently plans own, lifelong learning, while also being able to guide others in this regard	Develops his/her potential and independently plans his/her own learning in the field of robotics.	[SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment
	[K7_U14] integrates information obtained from literature and other properly selected sources, including those in a foreign language, creatively interpreting and critically evaluating them, and drawing conclusions	Uses information obtained from literature and other appropriately selected sources, also in a foreign language, when carrying out tasks in the field of haptics and robotics.	[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools
Subject contents	1. Basic knowledge about haptics and robotics 2. Designing haptic systems 3. Software 4. Review of existing solutions		
Prerequisites and co-requisites	Knowledge in the field of mechatronic design, automation and robotics, programming and vibration analysis.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Written exam	50.0%	60.0%
	Report	50.0%	40.0%
Recommended reading	Basic literature	Janschek, Klaus. Mechatronic systems design: methods, models, concepts. Springer Science & Business Media, 2011. Hatzfeld, Christian, and Thorsten A. Kern. Engineering haptic devices. Springer London Limited, 2016.	
	Supplementary literature	Kaltenbacher, Manfred. Numerical simulation of mechatronic sensors and actuators. Vol. 2. Berlin: Springer, 2007. Eric Vezzoli, Chris Ullrich, Gijs den Butter, Rafal Pijewski. XR Haptics, Implementation & Design Guidelines. 2022	
	eResources addresses	Adresy na platformie eNauczenie:	
Example issues/ example questions/ tasks being completed	1. What is a haptic? 2. What are the differences between the sense of touch and the sense of sight? 3. Discuss the differences between kinesthetic and tactile sensors. 4. What is the difference between haptic devices whose construction is based on impedance and those based on admittance? 5. List the applications of haptic systems. 6. What frequency ranges can be used in haptic systems? 7. Types of drives used in haptic systems. 8. How is sliding control implemented? 9. What is image segmentation.		
Work placement	Not applicable
