

## Subject card

Subject name and code	Process apparatus in environmental protection, PG_00064937						
Field of study	Mechanical Engineering						
Date of commencement of studies	February 2025		Academic year of realisation of subject		2025/2026		
Education level	second-cycle studies		Subject group		Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Energy and Industrial Apparatus -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bartosz Dawidowicz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	9.0	0.0	0.0	9.0	0.0	18
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	18		5.0		27.0	50
Subject objectives	Teaching the basics of construction and calculation of typical devices from process apparatus used in environmental protection. Indication of the specificity of devices in this application. Providing the methodology for calculating the dimensions of selected elements of the installation.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U15] evaluates the feasibility of advanced methods and tools for solving complex engineering tasks of a practical nature, characteristic of the field of study, and selects and applies appropriate methods and tools for this purpose		The student is able to design a device using engineering tools.		[SU1] Assessment of task fulfilment		
	[K7_W04] demonstrates knowledge covering selected topics of advanced specific knowledge, in particular methods, techniques, tools specific to Mechanics and Mechanical Engineering processes, systems and equipment		The student is able to calculate the basic dimensions of selected devices and apparatus used in environmental protection.		[SW3] Assessment of knowledge contained in written work and projects		
	[K7_W13] explains the main principles of individual and teamwork organization, including various forms of entrepreneurship utilizing knowledge from the field of engineering and technical sciences and disciplines relevant to the course of study		The student has knowledge of process equipment in environmental protection.		[SW1] Assessment of factual knowledge		
Subject contents	Lecture. Concepts of process apparatus and environmental protection engineering. Overview of the elements and equipment of the apparatus. Construction materials used in the construction of process apparatus. Selected issues of process equipment, including REACTORS. General concepts, classification, their place in environmental protection. Technological operations carried out in reactors: mixing, air injection, circulation of the reactor contents. Periodic and flow reactors. Ideal and real reactors. Dynamic characteristics. Cascade. Types of flows in reactors. Aeration systems. Construction of diffusers. Mixing power, examples of mixers used in reactors. TANKS FOR WASTEWATER. Construction. Basics of calculations. Apparatus used for secondary and subsequent treatment of sewage. SEALS. Stabilization. Thickening. Drainage. Basics of device construction. Other examples of process equipment in environmental protection. DESIGN. Selected issues in the design of apparatus, eg: the basics and methods of dimensioning the treatment plant. Selected processes in environmental protection						

Prerequisites and co-requisites	basics of physics, chemistry, fluid mechanics and wastewater treatment		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Grade of the project	56.0%	50.0%
	Exam from the lecture	56.0%	50.0%
