

Subject card

Subject name and code	Modelling of heat and plastic treatment processes of materials, PG_00064940						
Field of study	Mechanical Engineering						
Date of commencement of studies	February 2025	Academic year of realisation of subject				2025/2026	
Education level	second-cycle studies	Subject group				Specialty subject group Subject group related to scientific research in the field of study	
Mode of study	Part-time studies	Mode of delivery				at the university	
Year of study	1	Language of instruction				Polish	
Semester of study	2	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				exam	
Conducting unit	Zakład Materiałoznawstwa I Technologii Materiałowych -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Michał Landowski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	18.0	0.0	9.0	9.0	0.0	36
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	36		4.0		60.0	100
Subject objectives	The aim of the course is to familiarize students with the basic issues related to heat treatment and plastic working of construction materials.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W01] explains and describes, on the basis of general knowledge of the scientific disciplines forming the theoretical basis of Mechanics and Mechanical Engineering, the structure and principles of operation of mechanical systems and processes	The student is able to describe the operation of processing equipment.			[SW3] Assessment of knowledge contained in written work and projects		
	[K7_U04] creatively designs or modifies devices, processes or systems specific to Mechanics and Mechanical Engineering, using computer-aided design systems in the form of technical documentation, taking into account aspects of economic analysis, using appropriate tools and techniques	The student designs tool elements for forming processes.			[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	[K7_W04] demonstrates knowledge covering selected topics of advanced specific knowledge, in particular methods, techniques, tools specific to Mechanics and Mechanical Engineering processes, systems and equipment	The student demonstrates knowledge about issues of heat treatment and forming.			[SW1] Assessment of factual knowledge		
	[K7_W13] explains the main principles of individual and teamwork organization, including various forms of entrepreneurship utilizing knowledge from the field of engineering and technical sciences and disciplines relevant to the course of study	As part of the project, the student works in a team to solve a technical problem.			[SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>Lecture: Design and modeling of thermo-chemical treatment processes in relation to plastics iron-based metal. Diffusion saturation with non-metallic elements. Nitriding conventional and ionic, selective nitriding. Conventional carburizing, high temperature and ionic. Diffusion saturation with metallic elements. Machining defects thermochemical. Basics of plastic working. Plastic deformation of metals. The influence of plastic deformation on the properties of metals. Classification of plastic working processes. Rolling of metals. Rolling of sections. Rolling of pipes. Forging and ironing. Forging and pressing machines. Open-die forging. Die forging. Classification of forgings. Drawing and extrusion. Characteristics of drawing and extrusion processes. Drawing machines. Extrusion presses. Technology for drawing bars, wires and pipes. Technology of extrusion processes. Classification of pressing processes. Metal cutting. Metal bending. Multiple and simultaneous pressing</p> <p>Project: Design of the OC process, Design of the plastic forming process</p> <p>Laboratory: Hardening, tempering, thermo-chemical treatment, plastic forming processes</p>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="451 595 794 629">Subject passing criteria</th> <th data-bbox="794 595 1137 629">Passing threshold</th> <th data-bbox="1137 595 1487 629">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 629 794 663">Laboratory</td> <td data-bbox="794 629 1137 663">50.0%</td> <td data-bbox="1137 629 1487 663">30.0%</td> </tr> <tr> <td data-bbox="451 663 794 696">Project</td> <td data-bbox="794 663 1137 696">50.0%</td> <td data-bbox="1137 663 1487 696">40.0%</td> </tr> <tr> <td data-bbox="451 696 794 730">Exam</td> <td data-bbox="794 696 1137 730">50.0%</td> <td data-bbox="1137 696 1487 730">30.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Laboratory	50.0%	30.0%	Project	50.0%	40.0%	Exam	50.0%	30.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Laboratory	50.0%	30.0%													
Project	50.0%	40.0%													
Exam	50.0%	30.0%
