

Subject card

Subject name and code	Nanotechnology in biomaterials, PG_00065010						
Field of study	Mechanical and Medical Engineering						
Date of commencement of studies	February 2025		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Zakład Technologii Biomateriałów -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Michał Bartmański				
	Teachers		dr inż. Michał Bartmański mgr inż. Joanna Sypniewska dr inż. Alicja Stanisławska dr inż. Beata Majkowska-Marzec dr inż. Magdalena Jażdżewska dr inż. Łukasz Pawłowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	15.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		8.0		22.0	75
Subject objectives	The aim of the course is to provide knowledge on the following issues: nanotechnologies in biomaterials in diagnostics; in dentistry and maxillofacial surgery; in orthopedics; in cardiology; in internal medicine; in ophthalmology; in surgery; in pharmacotherapy and other medical applications. In addition, the student will be introduced to methods of fabricating surface modifications of implants using nanotechnology and methods of testing them.Translated with www.DeepL.com/Translator (free version)						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_W13] explains the main principles of individual and teamwork organization, including various forms of entrepreneurship utilizing knowledge from the field of engineering and technical sciences and disciplines relevant to the course of study	The student/student is able to work in a group, assuming various roles in the group, during the laboratory production of bionanomaterials.	[SW3] Assessment of knowledge contained in written work and projects
	[K7_U02] formulates hypotheses to test research problems in the field of medical engineering	The student/student is able to design experiments and determine the effect of manufacturing parameters of surface modification of biomaterials on their properties.	[SU3] Assessment of ability to use knowledge gained from the subject
	[K7_W03] has structured and well-founded knowledge covering issues in the field of medical engineering allowing to design medical devices, rehabilitation systems and to formulate research procedures	The student/student is able to correctly select appropriate techniques to produce a specific surface modification of biomedical materials.	[SW3] Assessment of knowledge contained in written work and projects
	[K7_K13] is ready for responsible performance of professional roles, considering ever-changing need of the society, including self development and supporting and fulfilling work ethics	The student/student knows the ethical aspects of bionanomaterials research, including research using living organisms, and the impact of nanomaterials on the environment.	[SK2] Assessment of progress of work
Subject contents	Nanotechnologies in biomaterials in diagnostics; in dentistry and maxillofacial surgery; in orthopedics; in cardiology; in internal medicine; in ophthalmology; in surgery; in pharmacotherapy; in other medical applications. Methods for modification of implant surfaces using nanotechnology. Project of implant surface modification technology.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory	56.0%	20.0%
	Project	56.0%	20.0%
	Colloquium	56.0%	60.0%
